Definitions

**Accounting estimate**—A monetary amount for which the measurement, in accordance with the requirements of the applicable financial reporting framework, is subject to estimation uncertainty.

**Accounting records**—The records of initial accounting entries and supporting records, such as checks and records of electronic fund transfers; invoices; contracts; the general and subsidiary ledgers, journal entries and other adjustments to the financial statements that are not reflected in formal journal entries; and records such as work sheets and spreadsheets supporting cost allocations, computations, reconciliations and disclosures.

**Analytical procedures**—Evaluations of financial information through analysis of plausible relationships among both financial and non-financial data. Analytical procedures also encompass such investigation as is necessary of identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount.

**Annual report**—A document, or combination of documents, prepared typically on an annual basis by management or those charged with governance in accordance with law, regulation or custom, the purpose of which is to provide owners (or similar stakeholders) with information on the entity’s operations and the entity’s financial results and financial position as set out in the financial statements. An annual report contains or accompanies the financial statements and the auditor’s report thereon and usually includes information about the entity’s developments, its future outlook and risks and uncertainties, a statement by the entity’s governing body, and reports covering governance matters.

**Anomaly**—A misstatement or deviation that is demonstrably not representative of misstatements or deviations in a population.

**Applicable financial reporting framework**—The financial reporting framework adopted by management and, where appropriate, those charged with governance in the preparation of the financial statements that is acceptable in view of the nature of the entity and the objective of the financial statements, or that is required by law or regulation.

The term “fair presentation framework” is used to refer to a financial reporting framework that requires compliance with the requirements of the framework and:

(a) Acknowledges explicitly or implicitly that, to achieve fair presentation of the financial statements, it may be necessary for management to provide disclosures beyond those specifically required by the framework; or

(b) Acknowledges explicitly that it may be necessary for management to depart from a requirement of the framework to achieve fair presentation of the financial statements. Such departures are expected to be necessary only in extremely rare circumstances.

The term “compliance framework” is used to refer to a financial reporting framework that requires compliance with the requirements of the framework, but does not contain the acknowledgements in (a) or (b) above.

**Appropriateness (of audit evidence)**—The measure of the quality of audit evidence; that is, its relevance
and its reliability in providing support for the conclusions on which the auditor’s opinion is based.

**Arm’s length transaction**—A transaction conducted on such terms and conditions as between a willing buyer and a willing seller who are unrelated and are acting independently of each other and pursuing their own best interests.

**Assertions**—Representations, explicit or otherwise, with respect to the recognition, measurement, presentation and disclosure of information in the financial statements which are inherent in management representing that the financial statements are prepared in accordance with the applicable financial reporting framework. Assertions are used by the auditor to consider the different types of potential misstatements that may occur when identifying, assessing and responding to the risks of material misstatement.

**Assurance**—(see Reasonable assurance)

**Audit documentation**—The record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached (terms such as “working papers” or “workpapers” are also sometimes used).

**Audit evidence**—Information used by the auditor in arriving at the conclusions on which the auditor’s opinion is based. Audit evidence includes both information contained in the accounting records underlying the financial statements and other information. (See Sufficiency of audit evidence and Appropriateness of audit evidence.)

**Audit file**—One or more folders or other storage media, in physical or electronic form, containing the records that comprise the audit documentation for a specific engagement.

**Audit firm**—(see Firm)

**Audit opinion**—(see Modified opinion and Unmodified opinion)

**Audit risk**—The risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risks of material misstatement and detection risk.

**Audit sampling (sampling)**—The application of audit procedures to less than 100% of items within a population of audit relevance such that all sampling units have a chance of selection in order to provide the auditor with a reasonable basis on which to draw conclusions about the entire population.

**Auditor**—“Auditor” is used to refer to the person or persons conducting the audit, usually the engagement partner or other members of the engagement team, or, as applicable, the firm. Where the ISA for LCE expressly intends that a requirement or responsibility be fulfilled by the engagement partner, the term “engagement partner” rather than “auditor” is used. “Engagement partner” and “firm” are to be read as referring to their public sector equivalents where relevant.

**Auditor’s expert**—An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the auditor to assist the auditor in obtaining sufficient appropriate audit evidence. An auditor’s expert may be either an auditor’s internal expert (who is a partner or staff, including temporary staff, of the auditor’s firm or a network firm), or an auditor’s external expert.

**Auditor’s point estimate or auditor’s range**—An amount, or range of amounts, respectively, developed by the auditor in evaluating management’s point estimate.
**Business risk**—A risk resulting from significant conditions, events, circumstances, actions or inactions that could adversely affect an entity’s ability to achieve its objectives and execute its strategies, or from the setting of inappropriate objectives and strategies.

**Comparative financial statements**—Comparative information where amounts and other disclosures for the prior period are included for comparison with the financial statements of the current period but, if audited, are referred to in the auditor’s opinion. The level of information included in those comparative financial statements is comparable with that of the financial statements of the current period.

**Comparative information**—The amounts and disclosures included in the financial statements in respect of one or more prior periods in accordance with the applicable financial reporting framework.

**Compliance framework**—(see Applicable financial reporting framework and General purpose framework)

**Control risk**—(see Risk of material misstatement)

**Corresponding figures**—Comparative information where amounts and other disclosures for the prior period are included as an integral part of the current period financial statements, and are intended to be read only in relation to the amounts and other disclosures relating to the current period (referred to as “current period figures”). The level of detail presented in the corresponding amounts and disclosures is dictated primarily by its relevance to the current period figures.

**Controls**—Policies or procedures that an entity establishes to achieve the control objectives of management or those charged with governance. In this context:

(a) Policies are statements of what should, or should not, be done within the entity to effect control. Such statements may be documented, explicitly stated in communications, or implied through actions and decisions.

(b) Procedures are actions to implement policies.

**Date of the auditor’s report**—The date the auditor dates the report on the financial statements.

**Date of the financial statements**—The date of the end of the latest period covered by the financial statements.

**Deficiency in internal control**—This exists when:

(a) A control is designed, implemented or operated in such a way that it is unable to prevent, or detect and correct, misstatements in the financial statements on a timely basis; or

(b) A control necessary to prevent, or detect and correct, misstatements in the financial statements on a timely basis is missing.

**Detection risk**—The risk that the procedures performed by the auditor to reduce audit risk to an acceptably low level will not detect a misstatement that exists and that could be material, either individually or when aggregated with other misstatements.

**Emphasis of Matter paragraph**—A paragraph included in the auditor’s report that refers to a matter appropriately presented or disclosed in the financial statements that, in the auditor’s judgment, is of such importance that it is fundamental to users’ understanding of the financial statements.
Engagement partner—The partner or other individual, appointed by the firm, who is responsible for the audit engagement and its performance, and for the auditor’s report that is issued on behalf of the firm, and who, where required, has the appropriate authority from a professional, legal or regulatory body.

Engagement quality review—An objective evaluation of the significant judgments made by the engagement team and the conclusions reached thereon, performed by the engagement quality reviewer and completed on or before the date of the engagement report.

Engagement quality reviewer—A partner, other individual in the firm, or an external individual, appointed by the firm to perform the engagement quality review.

Engagement team—All partners and staff performing the audit engagement, and any other individuals who perform audit procedures on the engagement, excluding an auditor’s external expert and internal auditors who provide direct assistance on an engagement.

Estimation uncertainty—Susceptibility to an inherent lack of precision in measurement.

Exception—A response that indicates a difference between information requested to be confirmed, or contained in the entity’s records, and information provided by the confirming party.

Experienced auditor—An individual (whether internal or external to the firm) who has practical audit experience, and a reasonable understanding of:

(a) Audit processes;
(b) The ISA for LCE and applicable legal and regulatory requirements;
(c) The business environment in which the entity operates; and
(d) Auditing and financial reporting issues relevant to the entity’s industry.

Expert—(see Auditor’s expert and Management’s expert)

Expertise—Skills, knowledge and experience in a particular field.

External confirmation—Audit evidence obtained as a direct written response to the auditor from a third party (the confirming party), in paper form, or by electronic or other medium.

Fair presentation framework—(see Applicable financial reporting framework and General purpose framework)

Financial statements—A structured representation of historical financial information, including disclosures, intended to communicate an entity’s economic resources or obligations at a point in time, or the changes therein for a period of time, in accordance with a financial reporting framework. The term “financial statements” ordinarily refers to a complete set of financial statements as determined by the requirements of the applicable financial reporting framework, but can also refer to a single financial statement. Disclosures comprise explanatory or descriptive information, set out as required, expressly permitted or otherwise allowed by the applicable financial reporting framework, on the face of a financial statement, or in the notes, or incorporated therein by cross-reference.

Firm—A sole practitioner, partnership or corporation or other entity of professional accountants, or public sector equivalent.

---

2 “Engagement partner,” “partner,” and “firm” is to be read as referring to their public sector equivalents where relevant.
Fraud—an intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception to obtain an unjust or illegal advantage.

Fraud risk factors—Events or conditions that indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud.

General information technology (IT) controls—Controls over the entity’s IT processes that support the continued proper operation of the IT environment, including the continued effective functioning of information processing controls and the integrity of information (i.e., the completeness, accuracy and validity of information) in the entity’s information system. Also see the definition of IT environment.

General purpose framework—A financial reporting framework designed to meet the common financial information needs of a wide range of users. The financial reporting framework may be a fair presentation framework or a compliance framework.

The term “fair presentation framework” is used to refer to a financial reporting framework that requires compliance with the requirements of the framework and:

(a) Acknowledges explicitly or implicitly that, to achieve fair presentation of the financial statements, it may be necessary for management to provide disclosures beyond those specifically required by the framework; or

(b) Acknowledges explicitly that it may be necessary for management to depart from a requirement of the framework to achieve fair presentation of the financial statements. Such departures are expected to be necessary only in extremely rare circumstances.

The term “compliance framework” is used to refer to a financial reporting framework that requires compliance with the requirements of the framework, but does not contain the acknowledgments in (i) or (ii) above.

Historical financial information—Information expressed in financial terms in relation to a particular entity, derived primarily from that entity’s accounting system, about economic events occurring in past time periods or about economic conditions or circumstances at points in time in the past.

Information processing controls—Controls relating to the processing of information in IT applications or manual information processes in the entity’s information system that directly address risks to the integrity of information (i.e., the completeness, accuracy and validity of transactions and other information).

Inherent risk—(see Risk of material misstatement)

Inherent risk factors—Characteristics of events or conditions that affect susceptibility to misstatement, whether due to fraud or error, of an assertion about a class of transactions, account balance or disclosure, before consideration of controls. Such factors may be qualitative or quantitative, and include complexity, subjectivity, change, uncertainty or susceptibility to misstatement due to management bias or other fraud risk factors insofar as they affect inherent risk.

Initial audit engagement—An engagement in which either:

(a) The financial statements for the prior period were not audited; or

(b) The financial statements for the prior period were audited by a predecessor auditor.

Internal control system—The system designed, implemented and maintained by those charged with governance, management and other personnel, to provide reasonable assurance about the achievement of
an entity’s objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations. For the purposes of the ISA for LCE, the internal control system consists of five inter-related components:

(a) Control environment;
(b) The entity’s risk assessment process;
(c) The entity’s process to monitor the system of internal control;
(d) The information system and communication; and
(e) Control activities.

**IT environment**—The IT applications and supporting IT infrastructure, as well as the IT processes and personnel involved in those processes, that an entity uses to support business operations and achieve business strategies. For the purposes of the ISA for LCE:

(a) An IT application is a program or a set of programs that is used in the initiation, processing, recording and reporting of transactions or information. IT applications include data warehouses and report writers.
(b) The IT infrastructure comprises the network, operating systems, and databases and their related hardware and software.
(c) The IT processes are the entity’s processes to manage access to the IT environment, manage program changes or changes to the IT environment and manage IT operations.

**Listed entity**—An entity whose shares, stock or debt are quoted or listed on a recognized stock exchange, or are marketed under the regulations of a recognized stock exchange or other equivalent body.

**Management**—The person(s) with executive responsibility for the conduct of the entity’s operations. For some entities in some jurisdictions, management includes some or all of those charged with governance, for example, executive members of a governance board, or an owner-manager.

**Management bias**—A lack of neutrality by management in the preparation of information.

**Management’s expert**—An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements.

**Misstatement**—A difference between the reported amount, classification, presentation, or disclosure of a financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be in accordance with the applicable financial reporting framework. Misstatements can arise from error or fraud.

Where the auditor expresses an opinion on whether the financial statements are presented fairly, in all material respects, or give a true and fair view, misstatements also include those adjustments of amounts, classifications, presentation, or disclosures that, in the auditor’s judgment, are necessary for the financial statements to be presented fairly, in all material respects, or to give a true and fair view.

Where the financial information is prepared in accordance with a fair presentation framework, misstatements also include those adjustments of amounts, classifications, presentation, or disclosures that, in the practitioner’s judgment, are necessary for the financial information to be presented fairly, in all material respects, or to give a true and fair view.
**Modified opinion**—A qualified opinion, an adverse opinion or a disclaimer of opinion on the financial statements.

**Network**—A larger structure:

(a) That is aimed at cooperation, and

(b) That is clearly aimed at profit or cost-sharing or shares common ownership, control or management, common quality management policies or procedures, common business strategy, the use of a common brand name, or a significant part of professional resources.

**Network firm**—A firm or entity that belongs to the firm’s network.

**Non-compliance (in the context of laws and regulations)**—Acts of omission or commission by the entity, either intentional or unintentional, which are contrary to the prevailing laws or regulations. Such acts include transactions entered into by, or in the name of, the entity, or on its behalf, by those charged with governance, management or employees. Non-compliance does not include personal misconduct (unrelated to the business activities of the entity) by those charged with governance, management or employees of the entity.

**Non-response**—A failure of the confirming party to respond, or fully respond, to a positive confirmation request, or a confirmation request returned undelivered.

**Opening balances**—Those account balances that exist at the beginning of the period. Opening balances are based upon the closing balances of the prior period and reflect the effects of transactions and events of prior periods and accounting policies applied in the prior period. Opening balances also include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments.

**Other information**—Financial or non-financial information (other than financial statements and the auditor’s report thereon) included in an entity’s annual report.

**Other Matter paragraph**—A paragraph included in the auditor’s report that refers to a matter other than those presented or disclosed in the financial statements that, in the auditor’s judgment, is relevant to users’ understanding of the audit, the auditor’s responsibilities or the auditor’s report.

**Partner**—Any individual with authority to bind the firm with respect to the performance of a professional services engagement.

**Performance materiality**—The amount or amounts set by the auditor at less than materiality for the financial statements as a whole to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole. If applicable, performance materiality also refers to the amount or amounts set by the auditor at less than the materiality level or levels for particular classes of transactions, account balances or disclosures.

**Personnel**—Partners and staff of the firm.

**Pervasive**—A term used, in the context of misstatements, to describe the effects on the financial statements of misstatements or the possible effects on the financial statements of misstatements, if any, that are undetected due to an inability to obtain sufficient appropriate audit evidence. Pervasive effects on the financial statements are those that, in the auditor’s judgment:

(a) Are not confined to specific elements, accounts or items of the financial statements;
(b) If so confined, represent or could represent a substantial proportion of the financial statements; or

(c) In relation to disclosures, are fundamental to users’ understanding of the financial statements.

**Population**—The entire set of data from which a sample is selected and about which the auditor wishes to draw conclusions.

**Positive confirmation request**—A request that the confirming party respond directly to the auditor indicating whether the confirming party agrees or disagrees with the information in the request, or providing the requested information.

**Preconditions for an audit**—The use by management of an acceptable financial reporting framework in the preparation of the financial statements and the agreement of management and, where appropriate, those charged with governance to the premise on which an audit is conducted.

**Predecessor auditor**—The auditor from a different audit firm, who audited the financial statements of an entity in the prior period and who has been replaced by the current auditor.

**Professional judgment**—The application of relevant training, knowledge and experience, within the context provided by auditing, accounting and ethical standards, in making informed decisions about the courses of action that are appropriate in the circumstances of the audit engagement.

**Professional skepticism**—An attitude that includes a questioning mind, being alert to conditions which may indicate possible misstatement due to error or fraud, and a critical assessment of evidence.

**Professional standards**—International Standard on Auditing (ISA) for Audits of Financial Statements of Less Complex Entities (ISA for LCE) and relevant ethical requirements.

**Reasonable assurance (in the context of audit engagements)**—A high, but not absolute, level of assurance.

**Related party**—A party that is either:

(a) A related party as defined in the applicable financial reporting framework; or

(b) Where the applicable financial reporting framework establishes minimal or no related party requirements:

   (i) A person or other entity that has control or significant influence, directly or indirectly through one or more intermediaries, over the reporting entity;

   (ii) Another entity over which the reporting entity has control or significant influence, directly or indirectly through one or more intermediaries; or

   (iii) Another entity that is under common control with the reporting entity through having:

      a. Common controlling ownership;

      b. Owners who are close family members; or

      c. Common key management.

However, entities that are under common control by a state (that is, a national, regional or local government) are not considered related unless they engage in significant transactions or share resources to a significant extent with one another.
**Relevant assertions**—An assertion about a class of transactions, account balance or disclosure is relevant when it has an identified risk of material misstatement. The determination of whether an assertion is a relevant assertion is made before consideration of any related controls (i.e., the inherent risk).

**Relevant ethical requirements**—Principles of professional ethics and ethical requirements that are applicable to professional accountants when undertaking the audit engagement. Relevant ethical requirements ordinarily comprise the provisions of the International Ethics Standards Board for Accountants’ *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code) related to audits of financial statements, together with national requirements that are more restrictive.

**Risks arising from the use of IT**—Susceptibility of information processing controls to ineffective design or operation, or risks to the integrity of information (i.e., the completeness, accuracy and validity of transactions and other information) in the entity’s information system, due to ineffective design or operation of controls in the entity’s IT processes (see IT environment).

**Risk of material misstatement**—The risk that the financial statements are materially misstated prior to audit. This consists of two components, described as follows at the assertion level:

(a) **Inherent risk**—The susceptibility of an assertion about a class of transaction, account balance or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls.

(b) **Control risk**—The risk that a misstatement that could occur in an assertion about a class of transaction, account balance or disclosure and that could be material, either individually or when aggregated with other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity’s internal control.

**Sampling**—(see Audit sampling)

**Sampling risk**—The risk that the auditor’s conclusion based on a sample may be different from the conclusion if the entire population were subjected to the same audit procedure. Sampling risk can lead to two types of erroneous conclusions:

(a) In the case of a test of controls, that controls are more effective than they actually are, or in the case of a test of details, that a material misstatement does not exist when in fact it does. The auditor is primarily concerned with this type of erroneous conclusion because it affects audit effectiveness and is more likely to lead to an inappropriate audit opinion.

(b) In the case of a test of controls, that controls are less effective than they actually are, or in the case of a test of details, that a material misstatement exists when in fact it does not. This type of erroneous conclusion affects audit efficiency as it would usually lead to additional work to establish that initial conclusions were incorrect.

**Sampling unit**—The individual items constituting a population.

**Service organization**—A third-party organization (or segment of a third-party organization) that provides services to user entities that are part of those entities’ information systems relevant to financial reporting.

**Significant risk**—An identified risk of material misstatement:

(a) For which the assessment of inherent risk is close to the upper end of the spectrum of inherent risk due to the degree to which inherent risk factors affect the combination of the likelihood of a
misstatement occurring and the magnitude of the potential misstatement should that
misstatement occur; or

(b) That is to be treated as a significant risk in accordance with the requirements of the ISA for LCE.

Subsequent events—Events occurring between the date of the financial statements and the date of the
auditor’s report, and facts that become known to the auditor after the date of the auditor’s report.

Substantive procedure—An audit procedure designed to detect material misstatements at the assertion
level. Substantive procedures comprise:

(a) Tests of details (of classes of transactions, account balances, and disclosures); and
(b) Substantive analytical procedures.

Sufficiency (of audit evidence)—The measure of the quantity of audit evidence. The quantity of the audit
evidence needed is affected by the auditor’s assessment of the risks of material misstatement and also by
the quality of such audit evidence.

Tests of controls—An audit procedure designed to evaluate the operating effectiveness of controls in
preventing, or detecting and correcting, material misstatements at the assertion level.

Those charged with governance—The person(s) or organization(s) (for example, a corporate trustee)
with responsibility for overseeing the strategic direction of the entity and obligations related to the
accountability of the entity. This includes overseeing the financial reporting process. For some entities in
some jurisdictions, those charged with governance may include management personnel, for example,
executive members of a governance board of a private or public sector entity, or an owner-manager.

Uncorrected misstatements—Misstatements that the auditor has accumulated during the audit and that
have not been corrected.

Unmodified opinion—The opinion expressed by the auditor when the auditor concludes that the financial
statements are prepared, in all material respects, in accordance with the applicable financial reporting
framework.

Written representation—A written statement by management provided to the auditor to confirm certain
matters or to support other audit evidence. Written representations in this context do not include financial
statements, the assertions therein, or supporting books and records.
