REVISION OF ISA 240 AND THE CONFORMING AND CONSEQUENTIAL AMENDMENTS TO OTHER RELEVANT ISAs TO ENHANCE OR CLARIFY THE AUDITOR’S RESPONSIBILITIES ON FRAUD IN AN AUDIT OF FINANCIAL STATEMENTS

This project proposal was developed and approved by the International Auditing and Assurance Standards Board (IAASB).

The IAASB develops auditing and assurance standards and guidance for use by all professional accountants under a shared standard-setting process involving the Public Interest Oversight Board (PIOB), which oversees the activities of the IAASB, and the IAASB Consultative Advisory Group (CAG), which provides public interest input into the development of the standards and guidance.

The objective of the IAASB is to serve the public interest by setting high-quality auditing, assurance, and other related standards and by facilitating the convergence of international and national auditing and assurance standards, thereby enhancing the quality and consistency of practice throughout the world and strengthening public confidence in the global auditing and assurance profession.

I. Subject

1. This project proposal addresses the revision of International Standard on Auditing (ISA) 240, The Auditor’s Responsibilities Relating to Fraud in an Audit of Financial Statements, and the conforming and consequential amendments to other relevant ISAs, to enhance or clarify the auditor’s responsibilities on fraud in an audit of financial statements.

II. Introduction

2. High quality audits support the smooth functioning of capital markets, overall economic performance and financial stability. The public interest is best served when participants in the financial reporting system have confidence in audits. However, corporate failures and scandals across the globe in recent years have brought the topic of fraud to the forefront and led to stakeholder questions around the role and responsibilities of the auditor on fraud in an audit of financial statements.

3. As described in the IAASB’s Strategy for 2020-2023, the IAASB is focused on prioritizing emerging public interest challenges and, as such, commenced information-gathering activities on fraud in an audit of financial statements in early 2020.

4. The objective of the information gathering and research activities on fraud was to further consider the issues and challenges in applying ISA 240 in light of the changing environment, jurisdictional developments and changing public expectations. Appendix A to this project proposal describes the information-gathering and research activities performed, including the development of the Discussion Paper (DP), Fraud and Going Concern in an Audit of Financial Statements: Exploring the Differences Between Public Perceptions About the Role of the Auditor and the Auditor’s Responsibilities in a Financial Statement Audit, which was published in September 2020 for consultation.
5. The timeline below sets out the activities performed in progressing the information gathering and research activities on fraud and the planned milestones for this project proposal, as guided by the processes and procedures in the IAASB’s Framework for Activities.

6. At the April, June and July 2021 IAASB meetings, the IAASB discussed the responses to the DP and possible actions to address the issues that had been identified. These possible actions included one or more of the following: (a) standard setting; (b) development of non-authoritative guidance; or (c) other related activities (including activities of an ‘educational nature’ or action for others in the financial reporting ecosystem). These discussions informed the development of this project proposal.

7. The IAASB recognizes the importance of the role of its auditing standards in the financial reporting ecosystem. However, the IAASB also acknowledges the view of respondents to the DP that

---

1 The ‘financial reporting ecosystem’ includes those involved in the preparation, approval, audit, analysis and use of financial reports, for example, the entity and its management (i.e., preparers), Boards and audit committees, external auditors, governments, regulators, professional bodies, standard-setters, investors, analysts, lenders, and other financial statement users. Each participant of this ecosystem plays a unique and essential role that contributes towards high quality financial reporting.

2 There were matters discussed with the Board where no further action has been proposed within this project proposal, including no further explicit consideration of the ‘expectation gap’ and suspicious mindset, and no changes to the definition of fraud and engagement quality reviews.
narrowing the expectation gap will involve a collaborative, multi-stakeholder solution by all participants in the financial reporting ecosystem, and the expectation gap will not solely be narrowed through standard setting by the IAASB.

8. The IAASB resolved to focus on standard-setting actions aimed at enabling consistent auditor behavior through clarifying the auditor’s responsibilities and enhancing the robustness of the required auditor’s procedures and reporting on fraud in an audit of financial statements. In addition to revisions to ISA 240, the IAASB anticipates making related conforming and consequential amendments to other relevant ISAs, taking into account the important interaction between ISA 240 and the other ISAs (because the auditor’s responsibilities relating to fraud in an audit of financial statements build on and supplement the principles of, and the procedures required by, other ISAs). The IAASB may also consider other actions as necessary and as resources are available, including encouraging complementary action by others (such as those charged with governance (TCWG), regulators, firms, etc.) that would address the broader public interest issues on fraud in an audit of financial statements.

9. The IAASB leveraged the Public Interest Framework (PIF) published by the Monitoring Group in July 2020 (as part of their report “Strengthening the International Audit and Ethics Standard-Setting System”) in developing this project proposal to articulate the public interest responsiveness of the project. Among other things the PIF sets out the considerations essential to the judgments needed in the development of standards. Although the PIF is not yet required to be implemented by the IAASB, it is likely this fraud project will be in progress and completed as and when the PIF is implemented. The Fraud Working Group therefore used those elements of the PIF deemed applicable and relevant to revising and developing auditing standards tailored as appropriate for the project on fraud as the basis for a restructured project proposal format, while still adhering to the due process requirements currently in place. However, as implementation of the PIF is still in the initial planning phase, there may be elements of the PIF that are relevant to standard-setting that will be further developed for the IAASB’s work more broadly in the future.

10. Throughout the duration of the project on fraud, the IAASB will benefit from the independent, direct oversight by the PIOB, and will remain transparent and adhere to the IAASB’s agreed strategies, due process, and the need to be responsive to the public interest.

11. This project proposal describes the project objectives that support the public interest, as well as the project scope for the work that will be undertaken in the project.

III. Project Objectives that Support the Public Interest

12. Taking into account the stakeholders whose interests are to be served through a project on fraud in an audit of financial statements (see Section IV), the project objectives are to:

   (a) Clarify the role and responsibilities of the auditor for fraud in an audit of financial statements.

   (b) Promote consistent behavior and facilitate effective responses to identified risks of material misstatement due to fraud through strengthening ISA 240 to establish more robust requirements and enhance and clarify application material where necessary.

---

3 See the PIF’s section on “What interests need to be served?” (on page 21 of the Monitoring Group’s report, “Strengthening the International Audit and Ethics Standard-Setting System”).
(c) Enhance ISA 240 to reinforce the importance, throughout the audit, of the appropriate exercise of professional skepticism in fraud-related audit procedures.

(d) Enhance transparency on fraud-related procedures where appropriate, including strengthening communications with TCWG and the reporting requirements in ISA 240 and other relevant ISAs.

13. The IAASB has the view that these project objectives capture an effective response to stakeholders’ needs, within the context of today’s financial reporting ecosystem, that have been identified in the information gathering and research process undertaken, and will contribute to the continued relevance and credibility of the ISAs in supporting quality financial reporting. It is recognized that the IAASB’s activities in this project are primarily focused on standard setting. However, such actions are unlikely to be sufficient on their own to address the expectation gap, without changes also being made to the respective role and responsibilities of other stakeholders in the financial reporting ecosystem. Although outside of the IAASB’s remit, broader coordinated collaboration involving multiple stakeholders may ultimately be needed to fully meet stakeholders’ expectations.

IV. Stakeholders Impacted by a Project on Fraud

14. This project will aim to serve the interests of all relevant stakeholders by addressing key issues identified by the IAASB’s stakeholders related to ISA 240.

15. The five broad stakeholder groups,4 who will be impacted by a project to enhance and clarify ISA 240 include:

- **Users of financial statements** (“the users”) – mainly investors, lenders, and other creditors, who rely on the audited financial statements to make resource allocation decisions.
- The **profession** – all auditors and assurance providers, and other professional accountants in public practice and business who apply the standards.
- Those in charge of **adoption, implementation and enforcement** of the standards as well as monitoring of the capital markets who rely on such standards— including national standard setters, regulators and audit inspectors, market authorities, public sector bodies, and professional accountancy organizations.
- **Preparers** – management and professional accountants in business, for entities of all sizes, in either the public or private sectors, as well as those charged with governance (e.g., audit committees who oversee the audit process), the latter group being relevant to addressing the information asymmetries among different parties involved in the functioning of companies, and who also provide the basis for the auditor’s work.
- **Other users** – the reliability of financial and non-financial information affects a very wide range of interests in society, including consumers, taxpayers, employees, competition and prudential authorities, central banks and bodies in charge of financial stability oversight, and those granting public contracts.

---

4 These five broad stakeholder groups are explained in the PIF’s section on “For whom are standards developed?” (on pages 20-21 of the Monitoring Group’s report, “Strengthening the International Audit and Ethics Standard-Setting System”).
16. In line with the PIF, standard setting that is in the public interest requires a process that elicits views from all stakeholders, with a focus on assessing the merits of the various stakeholder views, irrespective of whether the views are a majority or a minority. The public interest of standards cannot be ensured through a mere aggregation of all stakeholder interests, rather the public interest requires weighing and balancing all stakeholder views.

17. In order to address the public interest as contemplated by the PIF, and to achieve the objectives of this project proposal, the project on fraud will:

- Consider all stakeholder input and identify the different stakeholder interests that affect the overall objectives that will achieve the public interest;
- Appropriately weigh the input in terms of the public interest impact of the relative stakeholder interests; and
- Appropriately balance alternative outcomes in terms of the expected responsiveness to the public interest.

Although the PIF sets out a framework for how the public interest will be addressed, the approach to the consideration of stakeholder interests and how they are weighed is largely consistent with how stakeholder input is currently considered on IAASB projects (i.e., judgment is applied).

V. Key Issues Identified that Will be Addressed by a Project on Fraud

18. The needs of the IAASB’s stakeholders, which embody the public interest for this project, have been identified and are described in this project proposal as the “key issues.”

19. These key issues have been identified through the extensive information gathering and research activities described in Section II and Appendix A, and have been discussed with the IAASB in 2020 and 2021. The following key issues recognize the input of stakeholders and the resulting call to strengthen, enhance and clarify ISA 240:

- Role and responsibilities of the auditor on fraud in an audit of financial statements
  - The introductory paragraphs in ISA 240 explaining the inherent limitations of an audit can be misleading and result in misunderstanding of the auditor’s obligations.
  - There are misconceptions about the auditor’s responsibilities regarding fraud in an audit of financial statements.
  - There are terms and concepts associated with fraud, such as bribery corruption, and money laundering, that are not directly addressed in the definition of fraud, and it has

---

5 See the PIF’s sections on “For whom are standards developed?” and “How is the public interest responsiveness of a standard assessed?” (on pages 20-21 and 23-24, respectively, of the Monitoring Group’s report, “Strengthening the International Audit and Ethics Standard-Setting System”).

6 This project will recognize the importance of all stakeholders but will focus on users of audited financial statements. See the PIF’s section on “For whom are standards developed?” (on pages 20-21 of the Monitoring Group’s report, “Strengthening the International Audit and Ethics Standard-Setting System”).

7 See the PIF’s section on “How are the interests of users best served?” (on pages 21-22 of the Monitoring Group’s report, “Strengthening the International Audit and Ethics Standard-Setting System”).

8 See Appendix A, Basis for Project Proposal on Fraud.
been noted that it is therefore unclear whether the auditor’s procedures extend to include work related to such terms and concepts.

(iv) Calls for the auditor undertaking more forensic type procedures, or the need for forensic specialists on all, or some, audits have been made due to the increasing use of forensic procedures on audits, including by forensic specialists.

(b) **Identifying and assessing risks of material misstatement due to fraud**

(i) The auditor’s risk identification and assessment process as it relates to fraud should be more robust (including that many aspects of the enhanced risk identification and assessment procedures in ISA 315 (Revised 2019)\(^9\) have not been reflected in ISA 240).

(ii) The engagement team discussion is not sufficiently robust with respect to the auditor’s considerations of fraud throughout the audit.

(c) **Responses to the assessed risks of material misstatement due to fraud**

(i) The auditor’s responses to the assessed risks of material misstatement due to fraud should be more robust.

(ii) The auditor is inappropriately relying on written representations provided by management addressing fraud in the entity (i.e., clarity is needed that written representations do not relieve the auditor of the responsibility to obtain sufficient appropriate audit evidence about fraud).

(d) **Use of technology**

(i) ISA 240 needs to consider the impact of the entity’s ability to use technology to enable the execution of fraudulent activity on the auditor’s procedures.

(ii) ISA 240 needs to be modernized for the auditor’s considerations about how new and evolving technologies, and current practice, impacts the auditor’s procedures when considering fraud.

(e) **Relationship between and linkage of ISA 240 with respect to ISA 250 (Revised)\(^10\) and the other ISAs**

(i) The relationship between ISA 240 and ISA 250 (Revised) is unclear, i.e., more clarity is needed if a fraud is identified or suspected, whether the auditor is performing procedures to comply with ISA 240 or ISA 250 (Revised).

(ii) The relationship between ISA 240 and other ISAs (e.g., standards addressing quality management, written representations, and external confirmations) should be clarified to promote an integrated risk-based approach with respect to fraud.

(f) **Fraud-related audit procedures**

(i) Journal entries – uncertainty about how to select journal entries to test that has resulted in inconsistent application.

---

\(^9\) ISA 315 (Revised 2019), *Identifying and Assessing the Risks of Material Misstatement*

\(^10\) ISA 250 (Revised), *Consideration of Laws and Regulations in an Audit of Financial Statements*
(ii) Presumption of fraud risk in revenue recognition – it is not clear when it may, or may not, be appropriate to rebut the presumption of fraud risk in revenue recognition, which has resulted in inconsistent application.

(iii) Presumption of fraud risk in other account balances – stakeholders have questioned whether the presumption of fraud risk in revenue recognition should be extended to include other account balances, such as goodwill.

(iv) Analytical procedures – analytical procedures at the planning and completion stages of the audit are not robust enough to support the auditor’s consideration of the risk of fraud and the planned audit response (nature, timing, extent of audit procedures).

(v) Fraud is identified or suspected – lack of clarity around the auditor’s response in such circumstances.

(vi) Unpredictability of audit procedures – unclear as to the required actions or types of fraud-related procedures to be undertaken by the auditor.

(vii) Non-material fraud – clarity is needed with respect to the auditor’s responsibilities and whether more should be done when a possible non-material fraud is identified or suspected.

(viii) Third party fraud – clarity is needed around the auditor’s actions with respect to third party fraud.

(ix) Audit documentation – clarity is needed on what needs to be documented for fraud when identifying and assessing the risk of material misstatement, performing audit procedures and concluding.

(x) External confirmations – clarity is needed as to whether the external confirmation process, as relevant to the auditor’s considerations on fraud, should be more robust.

(g) Professional skepticism

(i) The appropriate exercise of professional skepticism needs to be reinforced, including reminding the auditor of the importance of remaining alert to conditions that may indicate possible fraud and maintaining professional skepticism throughout the audit.

(h) Transparency on the auditor’s fraud-related procedures

(i) The required communications with TCWG on fraud considerations may not be sufficiently robust in the current environment, including that such communications relating to fraud matters are not presently explicitly required throughout the audit.

(ii) The auditor’s report is not transparent enough about the auditor’s fraud-related responsibilities and procedures.

The additional clarification of specific areas of focus as noted by the stakeholders under each of the key issues described above will be addressed by the IAASB through standard setting, development of non-authoritative guidance or other actions, as outlined in the proposed actions in paragraphs 25 and 29-31, respectively.
VI. Scope of the Project on Fraud

20. The IAASB is committed to playing its role to instill confidence in financial reporting through activities within its remit, including revising, through strengthening, enhancing and clarifying, standards as needed, developing non-authoritative guidance, as well as outreach and continued dialogue to encourage action by others in the financial reporting ecosystem who also have a role to play.

21. It is intended that a project by the IAASB on the auditor’s considerations on fraud will contribute to continued trust in the financial reporting process by serving the needs of those stakeholders described in paragraph 15 above through addressing the key issues identified (as explained in paragraph 19). The table below summarizes the proposed actions to address the key issues identified. Each of the proposed actions described in this section correspond to the key issues identified (described in Section V above).

22. The proposed actions to address the key issues identified include:

   (a) Standard Setting (S) – Revising, through enhancing or clarifying, ISA 240 and the conforming and consequential amendments to other relevant ISAs.11

   (b) Non-Authoritative Guidance (NAG) – Developing supporting materials that are non-authoritative (i.e., outside of the ISAs).12

   (c) Other Actions (O) – Initiatives of an educational nature or other outreach where within the remit of the IAASB, and engagement with others (including continued dialogue and engagement with others in the financial reporting ecosystem on issues that relate to actions that are not within or solely within the IAASB’s remit).

Standard Setting and Non-Authoritative Guidance

23. Without pre-judging any matters that the Fraud Task Force may bring to the IAASB for discussion in the project, the table below includes a description of the proposed actions through standard setting and the development of non-authoritative guidance to address the key issues identified in Section V above. The proposed actions set out below to address the identified key issues are intended to provide a roadmap for the IAASB’s actions, however in developing changes, the nature or extent of the actions needed may vary as the revisions to ISA 240 are developed.

24. The IAASB’s remit is to develop high-quality auditing standards, and the focus of the project, as set out in the table below, is on standard-setting activities. However, the IAASB also recognizes the role

---

11 (S) addresses requirements or application material in ISA 240 (unless otherwise indicated such as the introductory paragraphs). This project proposal also recognizes that as these proposed actions are executed, the Fraud Task Force’s understanding about issues may evolve, requiring, for example, that a proposed action that was focused on application material may need to be expanded to also address a requirement(s). Proposed standard-setting actions are the focus of the project. The timeline for the development of the revisions is set out in paragraph 35.

12 (NAG) includes non-authoritative support material as contemplated in Component IV(B) of the IAASB’s Framework for Activities. This is in addition to any first-time implementation guide that would be issued after the revision of ISA 240 and is targeted to address the relevant topic (i.e., Frequently Asked Questions (FAQs) or diagrams / flow-charts or similar in nature). Proposed actions for the development of non-authoritative guidance shaded in lighter gray in the table in paragraph 25 indicate a lower order of prioritization relative to the proposed standard-setting actions (which are the focus of this project), and for which the timing will be dependent on the need for such guidance and the resources available at that time to develop the material. The possible timing for the development of non-authoritative guidance is set out in paragraph 35.
of others in the financial reporting ecosystem and the importance of encouraging action by others too. Other actions that form part of this project proposal are explained below the table.

25. The proposed actions within the scope of a project to revise ISA 240 include:

| 4    | Identifying and assessing risks of material misstatement due to fraud | X                  | **Requirements and Application Material – Identifying and Assessing Risks of Material Misstatement**

Enhance and clarify requirements and application material in ISA 240 to incorporate recent changes in ISA 315 (Revised 2019) to make fraud risk identification and assessment more robust, including:

- Developing explicit fraud considerations in risk assessment procedures
- Clarifying that risk assessment procedures in ISA 240 are not separate from those in ISA 315 (Revised 2019).
- Enhancing the requirements to consider information obtained from acceptance and continuance when obtaining an understanding of the entity and its environment, etc.
- Describing the auditor’s specific considerations relating to fraud when obtaining an understanding of the entity and its environment, the applicable financial reporting framework and the entity’s system of internal control in accordance with ISA 315 (Revised 2019), with an emphasis on, for example:
  - The entity’s corporate culture.
  - Entity’s key performance indicators (KPIs).
  - Employee performance measures and incentive compensation policies.
  - The entity’s risk assessment process.
  - Specific control activities to prevent and detect fraud.

<tr>
<td></td>
<td></td>
<td></td>
<td>o Considering revisions to clarify the interaction of key audit matters and fraud-related matters.</td>
</tr>
</tbody>
</table>

26. The PIF sets out the framework for the development of high-quality international standards by the IAASB that are responsive to the public interest. In explaining how the stakeholders’ needs can be served, the PIF sets out qualitative characteristics to assess a project’s responsiveness to the public interest. 

\(^{20}\) The term "explore" is used here because this is an area where significant mixed views were expressed by stakeholders and during Board deliberations on the need for enhanced transparency in the auditor's report and will require further consideration by the Fraud Task Force and the Board before possible actions can be proposed.
interest. Such qualitative characteristics include characteristics relevant to the judgments needed in the development of standards and those applicable to standard-setting more broadly. In developing and revising principles-based requirements and application material in revised ISA 240, the relevant qualitative characteristics described in the PIF that will be applicable to the changes being made as the project is being progressed include:

(a) **Scalability** (including proportionality to the standard’s relative impact on different stakeholders).

(b) **Relevance** (through recognizing and responding to emerging issues, changes in business or public practice environments, developments in accounting practices, or changes in technology).

(c) **Comprehensiveness** (through limiting the extent to which there are exceptions to the principles set out).

(d) **Clarity and conciseness** (to enhance understandability and minimize the likelihood of differing interpretations).

(e) **Implementability and ability of being consistently applied and globally operable**.

(f) **Enforceability** (through clearly stated responsibilities).

It is intended that these qualitative characteristics are explicitly considered as changes to ISA 240 are proposed.

27. In considering any changes to ISA 240, the Fraud Task Force will consider changes that have been made in other jurisdictions to their fraud-related standards, including by:

- Japan – The Business Accounting Council established a standard in 2013 titled “**Standard to Address Risks of Fraud in an Audit**” to be applied to audits of publicly traded companies.

---

21 See the PIF’s section on “What qualitative characteristics should the standards exhibit?” (on pages 22-23 of the Monitoring Group’s report, “**Strengthening the International Audit and Ethics Standard-Setting System**”).

22 The other qualitative characteristics apply more broadly, with some addressed by the matters set out in this project proposal, while others may need to be considered at the end of the project.

23 This standard introduces an increased emphasis on professional skepticism, clarifies fraud-related audit procedures, requires more cautious performance of audit procedures in certain circumstances, particularly when the auditor has determined that any suspicion of a material misstatement due to fraud exists, and establishes additional quality control considerations.

24 The consultation document supplements the Dutch Standards on Auditing with an obligation to always report on fraud and continuity in the auditor’s report. The proposed additions to the Dutch Auditing Standard 700 require the auditor to articulate in the auditor’s report how the audit has addressed significant continuity and fraud risks, respectively. In addition, the auditor may also disclose the results of these procedures or significant observations related to both subject matters.
The United Kingdom (UK) – The Financial Reporting Council (FRC) issued targeted revisions of its UK auditing standard on the responsibilities of auditors relating to fraud – **"ISA (UK) 240 (Revised May 2021), The Auditor’s Responsibilities Relating to Fraud in an Audit of Financial Statements"** in May 2021.

The Fraud Task Force will also continue to monitor global developments for any other changes that may be relevant to a project on fraud.

28. In revising ISA 240, the Fraud Task Force will follow the **CUSP Drafting Principles and Guidelines** to enable the writing of standards that result in the consistent and effective application of the ISAs. The Fraud Task Force will endeavor to:

   - Use clear, simple and concise language.
   - Take into account scalability and proportionality in assessing the standard’s public interest responsiveness.
   - Consider scalability related to LCEs and considerations specific to public sector entities.

**Other Actions**

29. To emphasize the importance of all stakeholders in the financial reporting ecosystem in addressing the issues and challenges raised on fraud, the project proposal includes proposed actions focusing on activities that are educational in nature and will likely involve engagement with others. Stakeholder feedback called for efforts to:

   - ‘Educate’ TCWG on the development and execution of anti-fraud programs and controls (e.g., championed by accountancy organizations, board associations, shareholder groups, etc.).
   - Enhance training about fraud in auditors’ continuing professional education, by both universities and professional accounting bodies (e.g., in the areas of fraud risk assessment, forensic skills, technological competence and applying a skeptical mindset (including topics such as behavioral science, e.g., concepts of conscious and unconscious bias)).
   - Develop financial statement auditors’ forensic skills and fraud awareness, including lessons learned from recent fraud cases.

30. Where within the remit of the IAASB, actions of an ‘educational nature’ will focus on emphasizing the importance of all stakeholders in the financial reporting ecosystem playing their role in addressing issues raised on fraud by:

   - Continuing discussions with stakeholders about the role they play over the course of the project (e.g., regulators and audit oversight bodies, national standard setters (NSS), investors and other users of the financial statements, audit firms, public sector organizations, corporate governance experts, academics, member bodies, and other professional organizations).
   - Issuing communications from the IAASB about the importance of this topic, including the role and responsibilities of the auditor and the role of others in the financial reporting ecosystem.

---

25 The targeted revisions to the UK’s equivalent standard are designed to provide increased clarity as to the auditor’s obligations, addressing the concern raised by Sir Donald Brydon in his review of the quality and effectiveness of audit.
Materials or actions may include short educational videos or webinars promoted on the IAASB’s website and social media accounts.

31. Where issues are not solely within the IAASB’s remit, other actions will focus on continued dialogue and engagement with other parties in the financial reporting ecosystem. The IAASB will also liaise and collaborate more broadly with the IESBA and the International Federation of Accountants (IFAC), including using the IAASB’s, IESBA’s and IFAC’s global voices in encouraging action for others, and engaging with IFAC’s International Panel on Accountancy Education (IPAE).

Ongoing Activities – Coordination with Other Task Forces, and Working and Consultation Groups

32. The project on fraud will involve coordination and collaboration with other IAASB task forces, working groups and consultation groups in addressing key issues identified, as the issues may also relate to other IAASB projects or ongoing initiatives. The project on fraud will also involve coordination and collaboration with the IESBA on certain matters to be addressed on fraud as described below. Planned ongoing activities in the course of the project include:

- Collaborating with the LCE Task Force when considering examples to illustrate the scalability of the requirements (e.g., providing examples that are more relevant to LCEs).
- Collaborating with the Technology Consultation Group to determine the need for certain non-authoritative guidance (as discussed in the table in paragraph 25 above) and to provide input and support to the Fraud Task Force on technology-related matters.
- Coordinating with the Audit Evidence Task Force in determining whether changes made in the project to revise ISA 500 impact the requirements in ISA 240, for example, with regard to the authenticity of audit evidence and whether (and how) aspects of evidence impact the auditor’s considerations about external confirmations.
- Monitoring technology-related changes made in the ISA 500 project and how this may be relevant to ISA 240 in terms of enhancing application material or developing non-authoritative guidance to promote a more integrated approach to the auditor’s fraud considerations.
- Collaborating with the Auditor Reporting Consultation Group as necessary on possible changes to the auditor’s report.
- Collaborating with other IAASB workstreams, such as the Professional Skepticism Consultation Group and other active projects where professional skepticism is being considered (e.g., Audit Evidence, Going Concern) in developing possible enhancements (requirements or application material) or non-authoritative guidance related to professional skepticism.
- Coordinating with the IESBA on any proposed changes in the project to revise ISA 240 that may impact the work of the IESBA. In addition, liaising with IESBA when developing non-authoritative materials that may involve aspects of the IESBA Code, such as when developing guidance about the required actions to be taken when responding to identified or suspected fraud under ISA 240, and non-compliance with laws or regulations under ISA 250 (Revised) (i.e., NOCLAR).
VII. Project Timeline, Project Priorities and Resources

33. The project will be undertaken in accordance with the Public Interest Activity Committees’ Due Process and Working Procedures.26

34. Subject to the IAASB’s approval of this project proposal, the project to revise ISA 240 will commence immediately. The priority actions within the project will be to undertake standard setting to address the key issues identified (see Sections V and VI). Other activities, including the development of non-authoritative guidance, will be undertaken when feasible and to the extent resources are available.

35. The IAASB proposes the following preliminary timetable, noting that specific project milestones and outputs may change as the project develops. In progressing the changes, if there are opportunities to advance the targeted timing, the Fraud Task Force will adjust its activities accordingly, and new targeted timelines will be communicated (it is noted that the Board will use best endeavors to aim for an effective date not beyond December 2026).

<table>
<thead>
<tr>
<th>Targeted Timing</th>
<th>Action(s)</th>
<th>Other</th>
</tr>
</thead>
</table>
| H1 2022 to H1 2023 | • Develop an exposure draft, including IAASB deliberation of issues, proposals and relevant discussion of the exposure draft.  
• Obtain input from the IAASB CAG on the issues and proposals, including discussing the exposure draft of ISA 240 (Revised) (including conforming and consequential amendments to other ISAs).  
• Outreach with other key stakeholders on key issues and proposals as the exposure draft is developed.  
• June 2023: Approval of an exposure draft by the IAASB. | • Development of non-authoritative guidance:  
o Linkages of ISAs to ISA 240.  
• Activities that are educational in nature on the responsibilities of an auditor on fraud in an audit of financial statements.  
• Ongoing monitoring of developments in different jurisdictions. |

---

26 As required by the IAASB’s Terms of Reference, this is the Due Process and Working Procedures as approved by the PIOB and that the IAASB must adhere to in developing its International Standards.
<table>

<th>Action(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Standard-Setting (Priority Actions)</td>
</tr>
</tbody>
</table>
| H2 2023         | • Publish exposure draft of proposed ISA 240 (Revised), with proposed conforming and consequential amendments to other ISAs and an Explanatory Memorandum for a 120-day comment period.  
• Outreach with other key stakeholders, who usually do not participate in the IAASB’s consultation on its exposure draft.  
• Comment period for responses to exposure draft closes. | • Development of non-authoritative guidance as deemed necessary by the IAASB.  
• Ongoing monitoring of developments in different jurisdictions. |
| H1 2024         | • IAASB deliberation of responses to the exposure draft and resulting proposed changes to ISA 240 (Revised).  
• Obtain CAG input on consideration of the responses to the exposure draft and proposed changes to ISA 240 (Revised) as a result of those responses.  
• Outreach with other key stakeholders on key issues as the final pronouncement is developed. | • Ongoing monitoring of developments in different jurisdictions. |
| H2 2024         | • As in H1 2024, deliberation of responses, obtaining CAG input and undertaking outreach.  
• IAASB approval of ISA 240 (Revised) and conforming and consequential amendments to other ISAs. |   |
<table>
<thead>
<tr>
<th>Targeted Timing</th>
<th>Action(s)</th>
<th>Other</th>
</tr>
</thead>
<tbody>
<tr>
<td>H1 2025</td>
<td>• PIOB approval of ISA 240 (Revised).&lt;br&gt;• Publication of final standard and Basis for Conclusions.</td>
<td>• Development and publication of first-time implementation guide.&lt;br&gt;• Development of non-authoritative guidance as deemed necessary by the IAASB.</td>
</tr>
</tbody>
</table>

36. In determining the resources required for a project to revise ISA 240, the IAASB will:

- Establish a task force responsible for the project and select task force members (comprising IAASB members or others, as appropriate, with diverse backgrounds). The selection process will also seek balance in:
  - Representation between practitioners and non-practitioners, including public members.27
  - Other representational needs, including geographic representation.
- Assign IAASB Staff to support the Fraud Task Force that is adequate to the weight of the project and with the appropriate level of seniority and experience. Given the scope of the project proposal to revise ISA 240, the IAASB anticipates assigning a director, a principal and a technical manager to the project.
- Consult with external experts or specialists in addressing targeted issues in the project for which the Fraud Task Force may need assistance in certain fields of expertise or specialization, for example, in forensics and technology.
- Consult with targeted stakeholder groups about changes, where necessary. For example, perform outreach with representatives from TCWG in developing changes that are relevant to the communications with TCWG.
- Allocate or coordinate resources, as needed, for the proposed other actions focusing on activities that are educational in nature and for engagement with others, including communication activities during the course of project.
- Use webinars, roundtables, surveys or other tools to explore actions or explain changes to the IAASB’s stakeholders as relevant.
- Prioritize the project and allocate sufficient Board plenary time to deliberate significant matters that will be raised from a broad stakeholder consultation process, and finalize the revision of ISA 240.

27 A public member is an individual who satisfies the requirements of a non-practitioner and is also expected to reflect, and is seen to reflect, the wider public interest. Not all non-practitioners are therefore eligible to be public members.
• Allocate sufficient time to consult with the CAG on significant issues raised during the course of the project.
• Allocate sufficient time to consult with the PIOB on its public interest issues relevant to the project.

VIII. Project Output and Impact

37. The expected output of the project is a revised ISA 240, with enhancements and clarifications, and conforming and consequential amendments to certain other ISAs, to achieve the objectives set out in this project proposal. In line with the PIF’s qualitative characteristics used to describe the assessment of a standard’s responsiveness to the public interest, the qualitative characteristics to be considered when finalizing this project include whether the revised standard (and its related conforming and consequential amendments):

(a) Are consistent with the identified public interest objectives set out for the project (see paragraph 12).
(b) Operate coherently with the overall body of ISAs.
(c) Address the identified key issues (see paragraph 19).
(d) Has responded, as appropriate to differing circumstances, emerging issues, changes in business or public practice environments, developments in accounting practices, or changes in technology.
(e) Reflects the results of broad consultation and has balanced stakeholder priorities.
(f) Has been developed with sufficient clarity and conciseness to support proper intended application and minimize the likelihood of differing interpretations.
(g) Is capable of being implemented effectively, and consistently applied globally.

These qualitative characteristics can be explored with the IAASB’s stakeholders in the exposure draft consultation (i.e., specific questions asking stakeholders about these matters will be included within the exposure draft). In addition, further input from stakeholders on these matters could form part of the post-implementation review of the revised ISA 240.

38. The impact of the changes from this project will come through effective implementation of the revised standard and monitoring of its application (e.g., through firms’ systems of quality management and external inspections, as well as with ongoing outreach with the IAASB’s key stakeholders). Notwithstanding that other environmental influences may also impact auditor behavior, the effective implementation of the revised standard and monitoring efforts, it is expected that enhancing or clarifying ISA 240 will result in:

• Improved audit quality through the consistent application of the requirements related to fraud procedures, in particular:
  o More robust risk identification and assessment procedures, and effective responses to identified risks.
  o Appropriate exercise of professional skepticism in fraud-related audit procedures.
o Enhanced transparency through communicating with TCWG and reporting on fraud-related procedures.

- Better meeting stakeholder expectations on the auditor's responsibilities (including the responsibilities of others in the financial reporting ecosystem) relating to fraud in an audit of financial statements, thereby enhancing confidence in audit engagements.

- Reduced inspection findings related to the auditor’s procedures on fraud in an audit of financial statements (recognizing that inspections findings are also affected by auditors failing to comply with a standard even though the requirements of the standard are clear and robust or different inspection regimes focus on other areas and may therefore not be consistently representative of changes in inspection findings).

39. It is encouraged that a post-implementation review be undertaken to assess whether the objectives for revising ISA 240 have been met and the standard has been effectively implemented, after allowing about three completed audit cycles after implementation of the revisions.
APPENDIX A

Basis of Project Proposal on Fraud

1. The IAASB undertakes wide-ranging information gathering and research activities in relation to possible new topics of global relevance to identify emerging issues, changing business or public practice environments, developments in accounting and auditing practices, and changes in technology that inform the development of new and revised standards that address the needs of the IAASB’s stakeholders.

2. Accordingly, this project proposal was developed on the basis of:

   (a) Information gathering activities:

      - The IAASB undertook an academic desktop review of relevant research on fraud in an audit of financial statements.28

      - The IAASB compiled feedback submitted by various stakeholders on the topic of fraud through other completed or ongoing IAASB projects, including ISA 540 (Revised), Auditor Reporting Standards,29 ISA Implementation Monitoring,30 ISA 315 (Revised 2019), Audits of LCEs, and the Strategy for 2020–2023 and Workplan for 2020–2021.

      - The IAASB considered results from reviews performed in other jurisdictions covering the topic of fraud in an audit of financial statements (e.g., the Brydon and Kingman reviews in the UK and the 2019 Fraud Thematic Review in Canada).

      - The IAASB liaised with representatives from the NSS on the topic of fraud during the IAASB’s May 2020 NSS virtual meeting, discussing initiatives that are ongoing or completed in different jurisdictions.

      - The IAASB met with representatives from Japan and the UK, respectively, to gather more information about (1) the separate fraud standard issued in Japan in 2013, and (2) the project in the UK to revise the UK fraud audit standard.31

      - The IAASB published the DP, Fraud and Going Concern in an Audit of Financial Statements: Exploring the Differences Between Public Perceptions About the Role of the Auditor and the Auditor’s Responsibilities in a Financial Statement Audit, which sets out the issues and challenges about the expectation gap (i.e., in general terms, the difference between what users of financial statements expect from the auditor and the

28 The academic desktop review included 111 reports on fraud.

29 The Auditor Reporting Standards comprise: ISA 700 (Revised), Forming an Opinion and Reporting on Financial Statements; ISA 701, Communicating Key Audit Matters in the Independent Auditor’s Report; ISA 705 (Revised), Modifications to the Opinion in the Independent Auditor’s Report; ISA 706 (Revised), Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor’s Report; ISA 570 (Revised), Going Concern; ISA 260 (Revised), Communication with Those Charged with Governance; and conforming amendments to other ISAs.

30 The IAASB’s ISA Implementation Monitoring Project was completed in July 2013 and was undertaken to determine whether further changes were needed to the ISAs arising from the IAASB’s Clarity project. Any findings as part of this review related to fraud have been included for consideration as part of the current initiatives on fraud.

31 On May 27, 2021, the UK FRC issued a revision of its UK auditing standard on the responsibilities of auditors relating to fraud – ISA (UK) 240 (Revised May 2021), The Auditor’s Responsibilities Relating to Fraud in an Audit of Financial Statements.
audit, and the reality of what an audit is) and explores some possible actions that the IAASB could undertake to help narrow the expectation gap (without favoring or committing to any specific actions at that stage). The DP was published in September 2020 and was open for comments until early 2021.

(b) Roundtables: 32

- **Technology-Focused Fraud Roundtable** – On September 1, 2020, the IAASB hosted the 1st of the roundtable series on fraud and going concern, which was focused on the impact of technology advancements on fraud perpetration and detection. This event was moderated by Fiona Campbell, former IAASB Deputy Chair, and virtually attended by 52 participants, IAASB members, official and staff observers. Participants included forensic specialists, financial statement auditors, fraud audit methodology experts, third party audit solution companies, regulators, academics, and public sector representatives.

- **Expectation Gap and Auditor Reporting Roundtable** – On September 28, 2020, the IAASB hosted the 2nd of the roundtable series on fraud and going concern, which was focused on the “expectation gap,” or differences between public perceptions and the auditor’s responsibilities for fraud and going concern. This event was moderated by Fiona Campbell, former IAASB Deputy Chair, and virtually attended by 58 participants, IAASB members, official and staff observers. Participants included investors, analysts, corporate governance experts, audit firms, academics, regulators, public sector representatives, and select others.

- **Audit Procedures Related to Fraud in Audits of LCEs** – On October 7, 2020, the IAASB hosted the 3rd of the roundtable series on fraud and going concern, which was focused on audits of LCEs. This event was moderated by Kai Morten Hagen, IAASB Member and then LCE Working Group Chair, and virtually attended by 44 participants, IAASB members, official and staff observers. Participants included auditors, audit methodology experts, and representatives of third-party audit solution companies and professional accountancy bodies.

(c) Root cause analysis efforts:

- The IAASB undertook efforts to better understand the root causes of recent fraud cases. IAASB members and staff contacted police and crime commission representatives, fraud investigators, regulators, and audit firms and held meetings to gather information on the following topics in relation to recent fraud cases:
  
  (a) How frauds are being executed and concealed;
  
  (b) Whether frauds involved related parties;
  
  (c) What financial accounts were impacted;

---

32 On November 2020, the IAASB published a Summary of Key Take-aways, which summarizes what the IAASB heard from the roundtables with experts and leaders exploring issues and challenges related to fraud and going concern. These roundtables focused on: (1) the impact of technology advancements on fraud perpetration and detection; (2) the “expectation gap,” or differences between public perceptions and the auditor’s responsibilities for fraud and going concern; and (3) fraud and going concern in audits of LCEs.
(d) How the frauds were eventually detected, and by who;

(e) Whether and to what extent technology was involved;

(f) Whether material frauds started small but grew over time (and if so, what length of
time), or whether the frauds were material from the start; and

(g) Any other details to help better understand the nature of the frauds and the root
causes of the issues as to why they were not prevented or detected earlier.

• Further, the IAASB discussed supplemental topics with audit firms, such as:

(a) Whether there have been any changes to the audit firm’s methodology or training
in relation to fraud in recent years;

(b) Whether they have any views as to the root causes of perceived audit failures in
relation to fraud; and

(c) To what extent forensic specialists are used and in what circumstances.

• A summary of the feedback received from the following outreach activities on the root
cause of fraud will be provided and discussed at the December 2021 IAASB meeting.
The root cause analysis findings were also considered in the development of the project
proposal.

(d) Other targeted outreach as set out below:

<table>
<thead>
<tr>
<th>Outreach Group</th>
<th>Date(s) Held</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Canadian Public Accountability Board (CPAB)</td>
<td>October 2, 2020</td>
<td>CPAB provided an update on their work on fraud. An IAASB member and staff provided an update on the IAASB’s fraud information gathering activities and high-level observations and take-aways from the roundtables held in September 2020.</td>
</tr>
<tr>
<td>Forum of Firms (FoF)</td>
<td>October 6, 2020</td>
<td>IAASB Staff provided the FoF with an update regarding the information gathering activities related to fraud and asked for broad feedback. The FoF was broadly supportive of the project and provided some additional feedback.</td>
</tr>
<tr>
<td>Center for Audit Quality (CAQ)</td>
<td>October 15, 2020</td>
<td>IAASB Staff provided the CAQ with high-level observations and take-aways from the three virtual IAASB roundtables discussed earlier in this document.</td>
</tr>
<tr>
<td>Outreach Group</td>
<td>Date(s) Held</td>
<td>Details</td>
</tr>
<tr>
<td>----------------------------------------------------</td>
<td>--------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Accountancy Europe</td>
<td>October 29, 2020</td>
<td>Accountancy Europe provided the IAASB with an update on their project focused on fraud. IAASB Staff provided Accountancy Europe participants with high-level observations and take-aways from the three virtual IAASB roundtables.</td>
</tr>
<tr>
<td>NSS</td>
<td>November 3, 2020</td>
<td>IAASB Staff provided the NSS with high-level observations and take-aways from the three virtual IAASB roundtables.</td>
</tr>
<tr>
<td>Auditing Section of the American Accounting Association (AAA)</td>
<td>January 15, 2021</td>
<td>A Fraud Working Group member participated in a panel discussion focused on fraud and the expectation gap hosted by the AAA.</td>
</tr>
<tr>
<td>European Audit Committee Leadership Network (EACLN) of the Tapestry Network</td>
<td>February 5, 2021</td>
<td>The IAASB chair and staff provided the EACLN with a brief explanation of the IAASB’s work on fraud in an audit of financial statements. The EACLN provided their views on concepts discussed in the DP.</td>
</tr>
<tr>
<td>Representatives from the Chartered Institute of Public Finance and Accountancy (CIPFA) and the European Court of Auditors (ECA)</td>
<td>February 22, 2021</td>
<td>IAASB Staff provided an explanation of the IAASB’s work on fraud in an audit of financial statements. The representatives from CIPFA and the ECA provided perspectives relevant to fraud in the public sector.</td>
</tr>
<tr>
<td>China Auditing and Assurance Standards Board (including official representatives from the Ministry of Finance and China Securities and Regulatory Commission)</td>
<td>March 13, 2021</td>
<td>A Fraud Working Group member provided an update on the IAASB fraud initiative and high-level observations from the DP responses.</td>
</tr>
<tr>
<td>Leadership Team of the Shenzhen Stock Exchange</td>
<td>March 13, 2021</td>
<td>A Fraud Working Group member provided an update on the IAASB fraud initiative and high-level observations from the DP responses.</td>
</tr>
<tr>
<td>Outreach Group</td>
<td>Date(s) Held</td>
<td>Details</td>
</tr>
<tr>
<td>----------------------------------------------------</td>
<td>--------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Accountancy Europe</td>
<td>March 22, 2021</td>
<td>IAASB Staff provided an update on the fraud and going concern initiatives, including an update of high-level themes from the DP responses. Accountancy Europe representatives provided an update on their fraud and going concern initiatives, noting their recently published publications on these topics and asked stakeholders to respond by April 30, 2021.</td>
</tr>
<tr>
<td>FoF</td>
<td>March 24, 2021</td>
<td>The Fraud Working Group Chair participated as panellist in discussion about fraud and provided brief high-level observations from the DP response analysis. Other panellists included representatives from Accountancy Europe, the UK FRC, and a corporate governance representative from Australia.</td>
</tr>
<tr>
<td>International Organization of Securities Commission (IOSCO)</td>
<td>March 24, 2021</td>
<td>IAASB members and staff provided IOSCO with high-level observations from the DP response analysis. IOSCO expressed their support for this project and noted the IAASB should consider all possible actions to address issues (whether standard setting or other actions, such as activities that are educational in nature or non-authoritative guidance).</td>
</tr>
<tr>
<td>International Forum of Independent Audit Regulators (IFIAR)</td>
<td>April 8, 2021</td>
<td>IAASB members and staff provided IFIAR with high-level observations from the DP response analysis. IFIAR expressed their support for this project.</td>
</tr>
<tr>
<td>UK FRC</td>
<td>April 20, 2021</td>
<td>The UK FRC provided IAASB Staff with an update on the responses to their consultation on proposed revisions to ISA (UK) 240.</td>
</tr>
<tr>
<td>Outreach Group</td>
<td>Date(s) Held</td>
<td>Details</td>
</tr>
<tr>
<td>----------------</td>
<td>--------------</td>
<td>---------</td>
</tr>
<tr>
<td>CPAB</td>
<td>April 23, 2021</td>
<td>IAASB member and staff provided an update of high-level observations from the DP. CPAB provided an update of activities performed in their jurisdiction.</td>
</tr>
<tr>
<td>Chartered Accountants Australia and New Zealand (CA ANZ)</td>
<td>April 27, 2021</td>
<td>The Fraud Working Group Chair received an update on the research paper being prepared by Association of Chartered Certified Accountants, Canadian Auditing Standards Board, CA ANZ and Chartered Professional Accountants Canada, including a discussion on the role of professional bodies in education and the various roles of the parties across the ecosystem.</td>
</tr>
<tr>
<td>The Royal Netherlands Institute of Chartered Accountants</td>
<td>May 12, 2021</td>
<td>IAASB member and staff were provided with the background and details of an auditor reporting pilot initiative in the Netherlands for increased transparency for fraud and going concern. The initiative is in its early phases and the IAASB will continue to monitor as it progresses.</td>
</tr>
<tr>
<td>IFAC Representatives, Including Staff Supporting the IPAE</td>
<td>June 11, 2021</td>
<td>IAASB Staff provided an update of high-level observations from the DP. IAASB Staff and IFAC representatives, including staff supporting the IPAE, held initial discussions about developing a collaborative, multi-stakeholder solution by all participants in the financial reporting ecosystem through educational efforts, including using the IAASB’s and IFAC’s global voice in encouraging action for others.</td>
</tr>
