International Standard on Auditing (ISA) 610 (Revised), *Using the Work of Internal Auditors* should be read in conjunction with ISA 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing*.

## Introduction

### Scope of this ISA

1. This International Standard on Auditing (ISA) deals with the external auditor's responsibilities when (a) relating to using the work of the internal auditors function in obtaining audit evidence and (b) using internal auditors, in limited circumstances, to provide direct assistance under the direction, supervision and review of the external auditor. [(b) moved from ¶3]
2. [1<sup>st</sup> sentence moved to ¶3c] ~~ISA 315 addresses the understanding the external auditor obtains of an entity's internal audit function (if the function exists) and inquiries the external auditor makes of internal auditors to obtain information relevant to the external auditor's risk assessment. This ISA addresses the use of the work of the internal audit function when the external auditor expects to use the work of the function to modify the nature or timing, or reduce the extent, of audit procedures to be performed. This ISA does not apply if the entity does not have an internal audit function with does not exist or the function's responsibilities and activities that are not related relevant to the audit entity's financial reporting. In addition, the external auditor need not apply the requirements in this ISA relating to using the work of the internal audit function do not apply if the external auditor does not expect to use any of such the work as part of the audit evidence obtained of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed. Furthermore, the requirements in this ISA relating to direct assistance do not apply if the external auditor does not plan to use internal auditors to provide obtain the direct assistance of internal auditors.~~ [last sentence moved from ¶3]
3. [moved to ¶1 & ¶2] ~~This ISA also addresses the external auditor's responsibilities when using internal auditors to provide direct assistance under the direction and supervision of the external auditor. The requirements relating to direct assistance do not apply if the external auditor does not plan to obtain the direct assistance of internal auditors. (Ref: Para. A1)~~
- 3a. Even if the internal audit function has performed work that may be relevant to the audit, nothing in this ISA requires the external auditor to use the work of the internal audit function or internal auditors to provide direct assistance; it remains the choice of the external auditor.
- 3b8. [moved from ¶8] ~~In some jurisdictions, the external auditor may be prohibited, or restricted to some extent, by law or regulation from using the work of the internal audit function or, from obtaining direct assistance from using internal auditors to provide direct assistance under the direction, supervision and review of the external auditor, or from communicating with the internal audit function to the extent contemplated in this ISA. The ISAs do not override laws or regulations that govern an audit of financial~~

statements.<sup>1</sup> ~~However, s~~Such prohibitions or restrictions will therefore not prevent the external auditor from complying with the ISAs ~~as this ISA does not require the external auditor to use the work of the internal audit function or to obtain direct assistance from internal auditors.~~

**Relationship between ISA 315 (Revised) and ISA 610 (Revised)~~the Internal Auditors and the External Auditor~~**

- 3c. [Moved from ¶2] ISA 315<sup>2</sup> addresses inquiries the external auditor makes of internal auditors (if the entity has an internal audit function) to obtain information relevant to the external auditor's risk assessment and the understanding the external auditor obtains of an entity's internal audit function (if the entity has such a function exists) and inquiries the external auditor makes of internal auditors to obtain information relevant to the external auditor's risk assessment [moved to beginning of the sentence].
- 3d. This ISA addresses ~~the use of the work of the internal audit function when~~ the external auditor's responsibilities when:
- (a) Based on the external auditor's preliminary understanding of the internal audit function obtained as a result of procedures performed under ISA 315, the external auditor expects to use the work of the internal audit function as part of the audit evidence obtained.<sup>3</sup> Use of that work to modify the nature or timing, or reduces the extent, of audit procedures to be performed directly by the external auditor; or
  - (b) The external auditor is considering, in limited circumstances, using internal auditors to provide direct assistance under the external auditor's direction, supervision and review.
4. [redrafted and moved to ¶7] ~~This ISA deals with how the external auditor determines whether to use the work of the internal audit function, and if so, to what extent and the external auditor's evaluation of the adequacy of the work of the internal audit function for purposes of the audit. It also deals with relevant considerations, including the types of procedures needed, when contemplating whether to use internal auditors to provide direct assistance.~~
5. [moved to ¶A3] ~~The objectives of the internal audit function are determined by management and, where applicable, those charged with governance and may include assurance and consulting activities within an entity designed to evaluate and improve the effectiveness of the entity's risk management, internal control, and governance processes.~~ [moved to ¶7] ~~An entity's internal audit function may perform audit procedures similar to those performed by the external auditor in an audit of financial statements.~~ [moved to

<sup>1</sup> ISA 200, Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing, paragraph A55

<sup>2</sup> ISA 315, Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment

<sup>3</sup> See paragraphs 13–19c of this ISA.

~~¶A3] For example, the internal audit function might plan and perform tests or other procedures to provide assurance to management and those charged with governance regarding the design, implementation and operating effectiveness of internal controls relevant to the external audit. (Ref: Para. A2-A3)~~ [Note: The 2<sup>nd</sup> sentence has been redrafted and reflected in ¶7. The 1<sup>st</sup> and 3<sup>rd</sup> sentences have been redrafted and reflected in ¶A3.]

6. ~~[moved to ¶7] External auditors may be able to use such work rather than perform that work themselves in obtaining sufficient appropriate audit evidence on which to base the auditor's opinion. Internal auditors may also provide direct assistance on the engagement by performing audit procedures under the direction and supervision of the external auditor. However, neither the internal audit function nor the internal auditors are independent of the entity as is required of the external auditor in an audit of financial statements in accordance with ISA 200.~~<sup>4</sup>
7. The external auditor has sole responsibility for the audit opinion expressed, and that responsibility is not reduced by the external auditor's use of the work of the internal audit function or internal auditors to provide direct assistance on the engagement. ~~For this reason, even if some of the internal audit function's activities appear relevant to the external audit relate to the entity's financial reporting, the external auditor may decide not to use the work of the internal audit function. Although they may perform audit procedures similar to those performed by the external auditor, neither the internal audit function nor the internal auditors are independent of the entity as is required of the external auditor in an audit of financial statements in accordance with ISA 200.~~<sup>5</sup> This ISA, therefore, defines the conditions that are necessary for the external auditor to be able to use the work of the internal audit function or internal auditors to provide direct assistance. It also defines the necessary work effort to obtain sufficient appropriate evidence that the work of the internal audit function, or internal auditors, is adequate for the purposes of the audit. The requirements are designed to provide a framework for the external auditor's judgments regarding the use of the work of the internal audit function, or internal auditors, to prevent over or undue use of such work. [moved from former ¶4, ¶5 and ¶6]
8. ~~[redrafted and reflected in ¶3b]~~
9. ~~[redrafted and reflected in ¶A3a]~~
10. There may be individuals ~~within~~ outside of an entity's internal audit function that perform ~~ad hoc~~ procedures similar to those performed by ~~an internal audit the~~ function. However, unless performed by an objective and competent function that applies a systematic and disciplined approach, including quality control, such procedures would be considered control activities and obtaining evidence regarding the effectiveness of such controls would be part of the auditor's responses to assessed risks in accordance with ISA 330.

<sup>4</sup> ~~ISA 200, Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing, paragraph 14~~

<sup>5</sup> ~~ISA 200, paragraph 14~~

## Effective Date

11. This ISA is effective for audits of financial statements for periods ending on or after December 15, 2013.

## Objectives

12. The objectives of the external auditor, where the entity has an internal audit function and the external auditor expects to use the work of the ~~internal audit~~ function to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor, or to use internal auditors to provide direct assistance, are:
- (a) To determine whether ~~to use~~ the work of the internal audit function or direct assistance from internal auditors can be used, and if so, in which areas and to what extent; and
  - (b) If using the work of the internal audit function or ~~obtaining direct assistance from~~ internal auditors to provide direct assistance, to determine whether that work is adequate for purposes of the audit.

## Definitions

For purposes of the ISAs, the following terms have the meanings attributed below:

- 12a. Direct assistance – The use of internal auditors to perform audit procedures, under the direction, supervision and review of the external auditor.
- 12b. Internal audit function – A function of an entity that performs assurance and consulting activities designed to evaluate and improve the effectiveness of the entity's governance, risk management and internal control processes. (Ref: Para. A3–A3d)
- 12c. Internal auditors – Individuals that perform the activities of the internal audit function.

## Requirements

**Determining Whether, in Which Areas and to What Extent ~~to Use~~ the Work of the Internal Audit Function Can Be Used**

~~*Determining Whether the Work of Evaluating the Internal Audit Function Can Be Used for Purposes of the Audit*~~

13. The external auditor shall determine whether the work of the internal audit function can be used for purposes of the audit by evaluating the following:
- (a) The extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors; (Ref: Para. A4–~~A7~~)
  - (b) The level of competence of the internal audit function; and (Ref: Para. A4–~~A7~~)
  - (c) Whether the internal audit function applies a systematic and disciplined approach, including quality control. (Ref: Para. A8–~~A9~~)

14. The external auditor shall not use the work of the internal audit function if the external auditor determines that it has:
- (a) [To align with ¶13(a)] The function's organizational status and relevant policies and procedures do not adequately support, and therefore pose significant threats to, a low degree of the objectivity of internal auditors, regardless of its the level of competence; or
  - (b) The function lacks sufficient a low level of competence, regardless of its even if there is no threat to the degree of objectivity of internal auditors; or
  - (c) The function does not apply a systematic and disciplined approach, including quality control, regardless of the objectivity of internal auditors and the competence of the internal audit function. (Ref: Para. A9a–A79c)

*Determining the Nature and Extent Planned Use of the Work of the Internal Audit Function that Can Be Used*

- 14a. As a basis for determining the areas and the extent to which the work of the internal audit function can be used, the external auditor shall consider the nature and scope of the work that has been performed, or is planned to be performed, by the internal audit function and its relevance to the external auditor's overall audit strategy and audit plan. (Ref: Para. A10) [parts of this ¶ moved from ¶15]
15. In determining the To prevent undue use of the work of the internal audit function, the external auditor shall planned to use less of the work of the internal audit function and perform more of the work directly, the external auditor shall consider: (Para Ref: A10a–A10b)
- (b) [moved to ¶14a] The nature and scope of work performed, or to be performed, by the internal audit function and its relevance to the external auditor's overall audit strategy and audit plan; and
  - (a) [elevated from ¶A12] The higher the assessed risk of material misstatement with special consideration given to risks identified as significant; (Para Ref: A12–A12b)
  - (be) The amount of more judgment is involved in:
    - (i) Planning and performing relevant audit procedures for particular classes of transactions, account balances and disclosures; and
    - (ii) Evaluating the audit evidence gathered by the internal audit function in support of the relevant assertions; (Ref: Para. A12c0–A132)
  - (ca) The external auditor's evaluation of the degree of greater the threats to the objectivity of internal auditors; and
  - (d) and The lower the level of competence of the internal audit function;
16. In addition, Because the external auditor has sole responsibility for the audit opinion expressed, the external auditor shall: (a) Make all the significant judgments in the audit engagement; and (b) [(b) replaced by ¶16a] Plan to directly perform sufficient

~~procedures to be able to draw reasonable conclusions on which to base the external auditor's opinion, regardless of the external auditor's decision to use the work of the internal audit function.~~ (Ref: Para. A13)

- 16a. ~~The external auditor shall evaluate whether the planned use of the work of the internal audit function would result in the external auditor being insufficiently involved in the audit overall and therefore unable to demonstrate sole responsibility for the audit opinion expressed.~~

### Using the Work of the Internal Audit Function

17. If the external auditor plans to use the work of the internal audit function, the external auditor shall discuss the planned use of their work with the internal audit function as a basis for coordinating their respective activities. (Ref: Para. ~~A14~~-A15a)

### Using the Work of the Internal Audit Function [header moved to before ¶17]

18. ~~Where the external auditor plans to use the work of the internal audit function, the external auditor shall read the reports of the function relating to such the work of the internal audit function that the external auditor plans to use to obtain an understanding of the nature and extent of audit procedures it performed and the related findings.~~ (Ref: Para. A16)
19. ~~In order to have a sufficient basis to support the use of work of the internal audit function, the external auditor shall perform audit procedures that are appropriate in the circumstances on that the body of work of the internal audit function that the external auditor plans to use to determine its adequacy for purposes of the audit engagement. In order to have a sufficient basis for the use of the work of the internal audit function, the nature, timing and extent of the external auditor's audit procedures shall be responsive to the external auditor's evaluation of the objectivity of the internal auditors and the competence of the internal audit function, the assessed risk of material misstatement and the amount of judgment involved.~~<sup>6</sup> (Ref: Para. A17–A19)
- 19a. [elevated from ¶A20] ~~The external auditor's audit procedures used shall include some reperformance on the body of work of the internal audit function that the external auditor plans to use.~~ (Ref: Para. A20)
- 19b. ~~Based on the audit procedures performed in paragraphs 19–19a of this ISA, and the audit evidence obtained, in determining the adequacy of such work,~~ the external auditor shall evaluate whether:
- (a) The work was properly planned, performed, supervised, reviewed and documented;
  - (b) ~~Adequate Sufficient appropriate audit~~ evidence has been obtained to enable the internal audit function to draw reasonable conclusions; and
  - (c) Conclusions reached are appropriate in the circumstances and ~~any the~~ reports prepared by the internal audit function are consistent with the results of the work

<sup>6</sup> See paragraph 15 of this ISA.

performed, demonstrating the overall quality of the function's work and the objectivity with which it has been performed. (Ref: Para. ~~A17~~-A21)

- 19c. The external auditor shall also evaluate whether the external auditor's conclusions regarding the internal audit function in paragraph 13 of this ISA and the determination of the nature and extent of use of the work of the internal audit function for purposes of the audit in paragraphs 15–16a of this ISA remain appropriate.

**Determining Whether, in Which Areas and to What Extent Internal Auditors Can Be Used to Provide** ~~Obtaining~~ **Direct Assistance from Internal Auditors** (Ref: Para. A22–~~A28~~6b)

*Determining Whether Internal Auditors Can Be Used to Provide Direct Assistance for Purpose of the Audit*

20. The external auditor may be prohibited by law or regulation from obtaining direct assistance from internal auditors. However, if the external auditor is permitted, and plans, to use internal auditors to provide direct assistance on the audit ~~engagement~~, the external auditor shall evaluate the ~~degree of threats to~~ objectivity and the level of competence of the internal auditors who will be providing such assistance.
21. The external auditor shall not ~~obtain the direct assistance of an~~ use an internal auditor to provide direct assistance ~~if the internal auditor has:~~
- (a) ~~a low degree of~~ There are significant threats to the objectivity of the internal auditor, ~~regardless of even if~~ the internal auditor's has the necessary level of competence; or
  - (b) ~~a low level of~~ The internal auditor lacks the necessary competence to perform the proposed work, ~~regardless of even if there is no threat to the objectivity of the~~ internal auditor's ~~degree of objectivity.~~

*Determining the Nature and Extent of Work that Can Be Assigned to Internal Auditors Providing Direct Assistance*

22. In determining the nature and extent of work that may be assigned to ~~individual~~ internal auditors and the nature, timing and extent ~~amount~~ of direction, supervision and review that is appropriate in the circumstances, the external auditor shall consider:
- (a) The external auditor's evaluation of the ~~degree threats to the of~~ objectivity and level of competence of the internal auditors who will be providing such assistance;
  - (b) The nature and scope of work to be performed by the internal auditors; and
  - (c) The amount of judgment involved in:
    - (i) Planning and performing relevant audit procedures for particular classes of transactions, account balances and disclosures; and
    - (ii) Evaluating the audit evidence in support of the relevant assertions. (Ref: Para. A11–~~A13~~)

23. The external auditor shall not ~~obtain direct assistance from use~~ internal auditors to provide direct assistance to perform procedures that:
- (a) Are designed to respond to a significant risk of material misstatement;
  - (ba) ~~Whereby the internal~~ Provide audit evidence on which the external auditors will rely when making significant judgments in the audit ~~engagement; or~~
  - (c) Relate to areas on which the internal audit function have already reported on to management or those charged with governance with which the internal auditors have been involved; or
  - (d) Relate to decisions the external auditor makes regarding the internal audit function and the use of its work or direct assistance.
  - ~~(b) To perform procedures to determine whether the work of the internal audit function can be used for purposes of the audit or to provide a sufficient basis to support the external auditor's use of the work of the internal audit function.~~

**Using Internal Auditors to Provide Direct Assistance** (Ref: Para. A27–A28)

- 23a. Prior to using internal auditors to provide direct assistance for purposes of the audit, the external auditor shall:
- (a) Obtain agreement from an appropriate representative of the entity that the internal auditors will be allowed to follow the external auditor's instructions, and that the entity will not intervene in the work the internal auditor performs for the external auditor; and
  - (b) Obtain agreement from the internal auditors that they will keep confidential specific matters as instructed by the external auditor and will inform the external auditor of any threat to their objectivity.
24. The external auditor shall direct, supervise and review the work performed by internal auditors on the engagement in accordance with ISA 220.<sup>7</sup> The nature, timing and extent level of direction, supervision, and review shall recognize that internal auditors are not independent of the entity and be responsive to the outcome of the evaluation of the factors in paragraph 22 of this ISA. The review procedures shall include the external auditor checking back to the underlying audit evidence for some of the work performed by the internal auditors.

**Information Brought to the External Auditor's Attention**

- 24a. If the internal audit function or an internal auditor brings information to the external auditor's attention that may be indicative of a heightened risk of a material misstatement of the financial statements or, regarding any actual, suspected or alleged fraud, the external auditor takes this into account in the external auditor's identification of risk of

---

<sup>7</sup> ISA 220, *Quality Control for an Audit of Financial Statements*

material misstatement due to fraud or error in accordance with ISA 240 and ISA 315 respectively.<sup>8</sup>

## Documentation

25. If the external auditor uses the work of the internal audit function, the external auditor shall include in the audit documentation:
- (a) The evaluation of the ~~degree~~ threats to ~~of~~ objectivity of internal auditors and the level of competence of the internal audit function, and whether it applies a systematic and disciplined approach, including quality control;
  - (b) The nature and extent of the work used and the basis for that decision; and
  - (c) The audit procedures performed by the external auditor to evaluate the adequacy of the work used.
26. If the external auditor uses ~~The working papers prepared by the~~ internal auditors ~~who to~~ provided direct assistance on the ~~audit engagement~~, the external auditor shall ~~be~~ included in the audit documentation:
- (a) The evaluation of the threats to objectivity and the level of competence of the internal auditors used to provide direct assistance;
  - (b) The nature and extent of the work performed by the internal auditors and the basis for that decision;
  - (c) The nature and extent of the external auditor's review of the audit work in accordance with ISA 230;
  - (d) The agreements obtained from an appropriate representative of the entity and the internal auditors under paragraph 23a of this ISA; and
  - (e) The working papers prepared by the internal auditors who provided direct assistance on the audit engagement.

\*\*\*

## Application and Other Explanatory Material

~~Scope of this ISA~~ (Ref: Para. 3)

A1. [redrafted and reflected in ¶A12b]

~~Definition of Internal Audit Function Relationship between the Internal Auditors and the External Auditor~~ (Ref: Para. 12b5)

---

<sup>8</sup> ISA 240, The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements, paragraph 19 and ISA 315, paragraph 6(a)

~~A2. As set out in ISA 315,<sup>9</sup> internal auditing refers to assurance and consulting activities within an entity designed to evaluate and improve the effectiveness of the entity's risk management, internal control, and governance processes.~~

A3. The objectives and scope of internal audit functions vary widely and depend on the size and structure of the entity and the requirements of management and, where applicable, those charged with governance. They typically include assurance and consulting activities designed to evaluate and improve the effectiveness of the entity's governance processes, risk management and internal control such as ~~The activities of the internal audit function may include one or more of~~ the following:

Activities relating to governance

- The internal audit function may assess the governance process in its accomplishment of objectives on ethics and values, performance management and accountability, communicating risk and control information to appropriate areas of the organization and effectiveness of communication among those charged with governance, external and internal auditors, and management. [¶ formerly comes after "Activities relating to internal control"]

Activities relating to risk management

- The internal audit function may assist the ~~organization entity~~ by identifying and evaluating significant exposures to risk and contributing to the improvement of risk management and internal control (including effectiveness of the financial reporting process).
- The internal audit function may perform procedures to assist the entity in the detection of fraud.

Activities relating to internal control

- Evaluation of internal control. The internal audit function may be assigned specific responsibility for reviewing controls, evaluating their operation and recommending improvements thereto. In doing so, the internal audit function provides assurance on the ~~operating effectiveness of the entity's internal~~ control. For example, the internal audit function might plan and perform tests or other procedures to provide assurance to management and those charged with governance regarding the design, implementation and operating effectiveness of internal controls, including those that are relevant to the ~~external~~ audit.
- Examination of financial and operating information. The internal audit function may be assigned to review the means used to identify, recognize, measure, classify and report financial and operating information, and to make specific inquiry into individual items, including detailed testing of transactions, balances and procedures.

---

<sup>9</sup> ~~—ISA 315, paragraph A101~~

- Review of operating activities. The internal audit function may be assigned to review the economy, efficiency and effectiveness of operating activities, including non-financial activities of an entity.
- Review of compliance with laws and regulations. The internal audit function may be assigned to review compliance with laws, regulations and other external requirements, and with management policies and directives and other internal requirements.

A3a9. [moved from ¶9] Activities similar to those performed by an internal audit function may be conducted by functions with other titles within an entity. Some or all of the activities of an internal audit function may also be outsourced to a third-party service provider. Neither the title of the function, nor whether it is performed by the entity or a third-party service provider, are sole determinants of whether or not the external auditor can use the work of the internal audit function. Rather, it is the nature of the activities, and the objectivity and competence, and systematic and disciplined approach of the function that are relevant. References in this ISA to the work of the internal audit function include relevant activities of other functions or third party providers that have these characteristics.

A3b. In addition, those in the entity with operational and managerial duties and responsibilities outside of the internal audit function would ordinarily face threats to their objectivity that would preclude them from being treated as part of an internal audit function for the purpose of this ISA, although they may perform control activities that can be tested in accordance with ISA 330.<sup>10</sup> For this reason, monitoring controls performed by an owner-manager would not be considered equivalent to an internal audit function.

A3c. While the objectives of an entity's internal audit function and the external auditor differ, the function may perform audit procedures similar to those performed by the external auditor in an audit of financial statements. If so, the external auditor may make use of the function for purposes of the audit in one or more of the following ways:

- To obtain information that is relevant to the external auditor's assessments of the risks of material misstatement due to error or fraud. In this regard, ISA 315<sup>11</sup> requires the external auditor to obtain an understanding of the nature of the internal audit function's responsibilities, its status within the organization, and the activities performed, or to be performed, and make inquiries of appropriate individuals within the internal audit function (if the entity has such a function); or
- Unless prohibited, or restricted to some extent, by law or regulation, the external auditor, after appropriate evaluation, may decide to use work that has been performed by the internal audit function during the period in partial substitution for audit evidence to be obtained directly by the external auditor.<sup>12</sup>

---

<sup>10</sup> See footnote 5.

<sup>11</sup> ISA 315, paragraph 6(a)

<sup>12</sup> See paragraphs 13–19c of this ISA.

In addition, unless prohibited, or restricted to some extent, by law or regulation, the external auditor may use internal auditors to perform audit procedures in limited circumstances under the direction, supervision and review of the external auditor (referred to as direct assistance in this ISA).<sup>13</sup>

A3d. This ISA describes the conditions which have to be met in order for the external auditor to be able to use results of those audit procedures as part of the audit evidence obtained for the external audit.

**Determining Whether, in Which Areas and to What Extent ~~to Use~~ the Work of the Internal Audit Function Can Be Used**

~~*Determining Whether the Work of Evaluating the Internal Audit Function Can Be Used for Purposes of the Audit*~~

Objectivity and Competence (Ref: Para. 13(a)–(b), ~~14~~)

A4. The external auditor exercises professional judgment in determining whether the work of the internal audit function can be used for purposes of the audit, and the nature and extent to which the work of the internal audit function ~~may~~ can be used in the circumstances.

A5. The ~~degree of threats to the~~ objectivity of internal auditors and the level of competence of the internal audit function are particularly important in determining whether to use, and if so, the nature and extent of the use of the work of the internal audit function that is appropriate in the circumstances.

A5a. Objectivity refers to the ability to perform those tasks without allowing bias, conflict of interest or undue influence of others to ~~override~~ compromise professional judgments. [moved to ¶A6] ~~Competence refers to the attainment and maintenance of knowledge and skills at the level required to enable assigned tasks to be performed diligently and in accordance with applicable professional standards. A6.~~ Factors that may affect the external auditor's ~~determination~~ evaluation include the following:

**Objectivity**

- Whether ~~the~~ the organizational status of the internal audit function, including the function's authority and accountability, within the entity and the effect such status has on supports the ability of the ~~internal audit~~ function to be free from bias, conflict of interest or undue influence of others to override professional judgments. For example, ~~Whether~~ whether the internal audit function reports to those charged with governance or an officer with appropriate authority, or if the internal audit function reports to management, and whether the internal audit function has direct access to those charged with governance.
- Whether the internal audit function is free of any conflicting responsibilities for example, having managerial or operational duties or responsibilities that are outside of the internal audit function.

<sup>13</sup> See paragraphs 20–24 of this ISA.

- Whether those charged with governance oversee employment decisions related to the internal audit function for example, determining the appropriate remuneration policy.
  - Whether there are any constraints or restrictions placed on the internal audit function by management or those charged with governance for example, in communicating internal audit findings to the external auditor.
  - Whether the internal auditors are members of relevant professional bodies and their memberships obligate their compliance with relevant professional standards relating to objectivity, or whether their internal policies achieve the same objectives.
- A6. Competence of the internal audit function refers to the attainment and maintenance of knowledge and skills of the function as a whole at the level required to enable assigned tasks to be performed diligently and in accordance with applicable professional standards. Factors that may affect the external auditor's determination include the following:
- Competence
- Whether the internal audit function is adequately and appropriately resourced relative to the size of the entity and the nature and extent of its work.
  - Whether there are established policies for hiring, training and assigning internal auditors to internal audit engagements.
  - Whether the internal auditors have adequate technical training and proficiency ~~as internal auditors in~~ auditing. Relevant criteria which may be considered by the external auditor in making the assessment may include for example, the internal auditors' possession of a relevant professional designation and experience.
  - Whether the internal auditors ~~including possession of~~ the required knowledge relating to the entity's financial reporting and the applicable financial reporting framework and whether the internal audit function possesses the necessary skills (for example, industry-specific knowledge) to perform work related to the entity's financial statements. Relevant criteria which may be considered by the external auditor in making the assessment may include for example, the internal auditors' possession of a relevant professional designation.
  - Whether the internal auditors are members of relevant professional bodies that and are obligated them to comply with the relevant professional standards including and continuing professional development requirements.
- A7. Objectivity and competence may be viewed as a continuum. The higher the degree of absence of significant threats to the objectivity of internal auditors and the higher the level of competence of the internal audit function, the more likely the external auditor may make use of the work of the internal audit function and in more areas. However, a high degree of the absence of any threats to the objectivity of internal auditors cannot compensate for a low level the lack of sufficient competence of the internal audit function, and equally, a high level of competence of the internal audit function cannot

compensate for the presence of significant threats to the ~~a lack of~~ objectivity of internal auditors.

Application of a Systematic and Disciplined Approach (Ref: Para. 13(c))

- A8. The application of a systematic and disciplined approach to planning, performing, supervising, reviewing and documenting its activities ~~is an important characteristic that~~ distinguishes the activities of the internal audit function from other monitoring control activities that may be performed within the entity.
- A9. Factors that may affect the external auditor's determination of whether the internal audit function applies a systematic and disciplined approach ~~to planning, performing, supervising, reviewing and documenting its activities~~ include the following:
- The existence, ~~and~~ adequacy and use of formal ~~of~~ internal audit procedures or guidance covering such areas as risk assessments, manuals or other similar documents, work programs, ~~and~~ documentation and reportings prepared by the internal audit function.
  - Whether the internal audit function has appropriate quality control policies and procedures for example, such as those policies and procedures in ISQC 1<sup>14</sup> that would be applicable to an internal audit function, including those relating to leadership, human resources and engagement performance. The relevant professional bodies for internal auditors may also establish other appropriate requirements such as conducting of periodic external quality assessments.

Circumstances When Work of the Internal Audit Function Cannot Be Used (Ref: Para. 14)

A9a. The external auditor's evaluation of the objectivity and competence of the function, and whether it applies a systematic and disciplined approach, may indicate that it is not appropriate to use any of the work of the function as audit evidence. As described in paragraph 14 of this ISA, if the function's organizational status and relevant policies and procedures do not adequately support the objectivity of internal auditors, if the function lacks competence or it does not apply a systematic and disciplined approach, including quality control, the risks to the quality of the work of the function are too significant for the external auditor to be able to use any of its work as audit evidence.

A9b. Consideration of the factors in paragraphs A5a, A6 and A9 of this ISA individually and in aggregate is important because an individual factor is often not sufficient to conclude that the work of the internal audit function cannot be used for purposes of the audit. For example, the internal audit function's organizational status is particularly important in evaluating the threats to the objectivity of the internal auditors. If the internal audit function reports administratively to management, this would be considered a significant threat to the function's objectivity unless other factors such as those described in

<sup>14</sup> International Standard on Quality Control (ISQC) 1, Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements

paragraph A5a of this ISA, collectively provide sufficient safeguards to reduce the threat to an acceptable level.

A9c. In addition, the IESBA Code<sup>15</sup> states that a self-review threat is created when the external auditor accepts an engagement to provide internal audit services to an audit client, and the results of those services will be used in conducting the audit. This is because of the possibility that the engagement team will use the results of the internal audit service without properly evaluating those results or without exercising the same level of professional skepticism as would be exercised when the internal audit work is performed by individuals who are not members of the firm. The IESBA Code<sup>16</sup> discusses the prohibitions that apply in certain circumstances and the threats and the safeguards that can be applied to reduce the threats to an acceptable level in other circumstances.

*Determining the Nature and Extent Planned Use of ~~the~~ Work of the Internal Audit Function that Can Be Used*

Factors Affecting the Determination of the Nature and Extent Planned Use of the Work of the Internal Audit Function that Can Be Used (Ref: Para. 1~~4a5~~—16a)

A10. Once the external auditor has determined that the work of the internal audit function can be used for purposes of the audit, a first consideration is whether the determination of the planned nature and extent scope of the work of the internal audit function that has been performed, or is planned to be performed is relevant to the overall audit strategy and audit plan that the external auditor has established in accordance with ISA 300.~~may decide to use in the circumstances will be influenced by the~~

A10a. The external auditor's determination of the planned nature and extent of use of the work of the internal audit function will be influenced by the external auditor's evaluation of the degree of threats to the objectivity of internal auditors and the level of competence of the internal audit function in paragraph 13 of this ISA, as well as whether the work of the internal audit function is relevant to the overall audit strategy and audit plan. In addition, the assessed risk of material misstatement at the assertion level and the amount of judgment needed in planning, performing and evaluating such work are inputs to the external auditor's determination.

A10b. Further, paragraph 14 of this ISA describes the circumstances in which the external auditor cannot use the work of the internal auditor function for purpose of the audit.

A11. [redrafted and reflected in ¶A12c]

Assessed risk of material misstatement

A12. For a particular account balance, class of transaction or disclosure, the higher an assessed risk of material misstatement at the assertion level ~~(in particular for significant risks)~~, the more judgment is often involved in planning and performing the audit procedures and evaluating

<sup>15</sup> The IESBA Code of Ethics for Professional Accountants (IESBA Code), section 290.199

<sup>16</sup> The IESBA Code, Section 290.195- 290.200

the results thereof. In such circumstances, the external auditor will need to perform more procedures directly in accordance with paragraph 15 of this ISA, and accordingly, it is less likely that the external auditor can make less substantial use of the work of the internal audit function in obtaining sufficient appropriate audit evidence. Furthermore, as explained in ISA 200,<sup>17</sup> the higher the assessed risks of material misstatement, the more persuasive the audit evidence required by the external auditor will need to be, and, therefore, the external auditor will need to perform more of the work directly. [last sentence moved from ¶A13]

A12a. As explained in ISA 315,<sup>18</sup> significant risks require special audit consideration and therefore the external auditor's ability to use the work of the internal audit function in relation to significant risks will be limited to procedures that involve little or no judgment. In addition, where the risks of material misstatement is other than low, the use of the work of the internal audit function alone is unlikely to reduce audit risk to an acceptably low level and eliminate the need for the external auditor to perform some tests of those assertions directly.

A12bA1. [moved from ¶A11] Carrying out procedures in accordance with this ISA may cause the external auditor to re-evaluate the external auditor's assessment of the risks of material misstatement. Consequently, this may affect the external auditor's determination of the relevance whether to use the work of the internal audit function to the audit and whether further application of this ISA is necessary. Similarly, the external auditor may decide not to otherwise use the work of the internal audit function to affect the nature, timing or extent of the external auditor's procedures, or to receive direct assistance from internal auditors. In those circumstances, the external auditor's further application of this ISA is not necessary.

#### Judgments in planning and performing audit procedures and evaluating results

A12cA11. [moved from ¶A11] The greater the amount of judgment that is needed to be exercised in planning and performing the audit procedures and evaluating the audit evidence results thereof, the more likely that the external auditor may will need to perform some more procedures directly in accordance with paragraph 15 of this ISA, because consideration of the work of the internal audit function alone will not is unlikely to provide the external auditor with sufficient appropriate audit evidence.

A13. Since the external auditor has sole responsibility for the audit opinion expressed, the external auditor needs to make the significant judgments in the audit engagement in accordance with paragraph 16. Significant judgments include the following:

- aAssessingments of the risks of material misstatements;<sub>;</sub>
- Evaluating the sufficiency of tests performed;<sub>;</sub>
- Evaluating the appropriateness of management's use of the going-concern assumption;<sub>;</sub>
- eEvaluatingon of significant accounting estimates;<sub>;</sub>

<sup>17</sup> ISA 200, paragraph A29

<sup>18</sup> ISA 315, paragraph 4(c)

- Evaluating the adequacy of disclosures in the financial statements, and other matters affecting the auditor's report.

~~[moved to ¶A12] Furthermore, as explained in ISA 200,<sup>19</sup> the higher the assessed risks of material misstatement, the more persuasive the audit evidence required by the external auditor will need to be, and, therefore, the more likely it will be that the external auditor will need to perform more of the work directly.~~

## **Using the Work of the Internal Audit Function**

*Discussion and Coordination with the Internal Audit Function* (Ref: Para. 17–~~18~~)

A14. In discussing the planned use of their work with the internal audit function as a basis for coordinating the respective activities, it may be useful to address the following:

- The timing of such work;
- The nature of the work performed
- The extent of audit coverage;
- Materiality for the financial statements as a whole (and, if applicable, materiality level or levels for particular classes of transactions, account balances or disclosures), and performance materiality;
- Proposed methods of item selection and sample sizes;
- Documentation of the work performed; ~~and~~
- Review and reporting procedures.

A15. Coordination between the external auditor and the internal audit function is effective when for example:

- Discussions take place at appropriate intervals throughout the period;
- The external auditor is advised of and has access to relevant internal audit reports and is informed of any significant matters that come to the attention of the internal audit function when such matters may affect the work of the external auditor so that the external auditor ~~may is able to~~ consider the implications of such matters for the audit engagement; and
- The external auditor informs the internal audit function of ~~any~~ significant matters that may affect the internal audit function.

A15a. In accordance with ISA 260,<sup>20</sup> the external auditor communicates with those charged with governance an overview of the planned scope and timing of the audit. In doing so, the external auditor may discuss the planned use of the work of the internal audit function.

<sup>19</sup> ~~ISA 200, paragraph A29~~

<sup>20</sup> ISA 260, Communication with Those Charged with Governance, paragraph 15

## **Using the Work of the Internal Audit Function**

### *Reading Reports of the Internal Audit Function (Ref: Para. 18)*

~~A16. Reading reports of the internal audit function relating to the work of the function that the external auditor intends to use assists the external auditor in obtaining an understanding of the nature and extent of audit procedures performed and the related findings.~~

### *Procedures to Determine the Adequacy of Work of the Internal Audit Function (Ref: Para. 19–19c)*

A17. Examples of work of the internal audit function that ~~may~~ can be used by the external auditor include the following:

- Testing of the operating effectiveness of controls
- Substantive procedures not involving the exercise of judgment (for example, checking items in reconciliations back to source documents)
- Observations of inventory counts
- Tracing transactions through the information system relevant to financial reporting
- Audits or reviews of compliance with regulatory requirements
- In some circumstances, Audits or reviews of the financial information, of subsidiaries that are not significant components to the group (where this does not conflict with the requirements of ISA 600<sup>21</sup>)

A18. The procedures the external auditor may perform to ~~appraise~~ evaluate the quality of the work performed and the conclusions reached by the internal audit function include the following:

- Reviewing the internal audit function's work program and working papers
- Reviewing ~~Reperforming some of~~ the work of the internal audit function
- Observing the procedures performed by the internal audit function in addition to reperforming some of such work
- Observing the procedures performed by the internal audit function
- Inquires of appropriate individuals within the internal audit function

A19. The nature, timing and extent of the audit procedures that the external auditor performs on the body of work of the internal audit function used in order to have a sufficient basis for the use of that work will depend on the external auditor's evaluation of:

- [moved from striked text below] The amount of judgment exercised by the internal audit function in planning and performing relevant audit procedures for particular classes of transactions, account balances and disclosures;
- the degree of Threats to the objectivity of internal auditors; and

<sup>21</sup> ISA 600, Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)

- The level of competence of the internal audit function;

[moved to first bullet above] ~~and the amount of judgment exercised by the function in planning and performing relevant audit procedures for particular classes of transactions, account balances and disclosures.~~ The lower the degree of—greater the threats to the objectivity of internal auditors or the lower the level of competence of the internal audit function, or the more judgment involved, the more audit procedures are needed to be performed by the external auditor to support the decision to use the work of the internal audit function in obtaining sufficient appropriate audit evidence on which to base the audit opinion.

- A20. Reperformance involves the external auditor's independent execution of procedures that were originally performed by the internal audit function. It involves examining items already examined by the internal audit function, or other similar items. While it is not necessary for the external auditor to do some reperformance in each area of work of the internal audit function that is being used, reperformance of some of such work is required because it provides more persuasive a stronger form of evidence regarding the adequacy of the work of the internal audit function for purposes of the audit. ~~Accordingly, in most circumstances, some reperformance of such work will be appropriate.~~ Moreover, the external auditor is more likely to focus reperformance, particularly for significant risks of material misstatement, in those areas where more judgment was exercised by the internal audit function in planning, performing and evaluating the results of the audit procedures.
- A21. In determining the adequacy of the work performed by the internal audit function, the external auditor may consider whether any exceptions or unusual matters disclosed by the function such as misstatements or control deficiencies are properly addressed by the entity and in the event they are not, whether the internal audit function followed-up on these matters.

**Obtaining—Determining Whether, in Which Areas and to What Extent Internal Auditors Can Be Used to Provide Direct Assistance from Internal Auditors** (Ref: Para. 20—234)

- A22. ~~It may be possible in some~~ In limited circumstances, ~~for the external auditor to may~~ obtain direct assistance from the internal auditors ~~into~~ carrying out audit procedures which otherwise would be performed directly by the external auditors themselves. In such circumstances, ~~external auditors use the~~ internal auditors are; under the direction, supervision and review of the external auditor ~~or team, to perform audit procedures directly on the engagement which otherwise would be performed by the external auditors themselves.~~
- A23. As described in paragraph 746 of this ISA, the external auditor has sole responsibility for the audit opinion expressed, and that responsibility is not reduced by the external auditor's decision to obtain the direct assistance of internal auditors on the audit ~~engagement.~~

A24. In accordance with ISA 260,<sup>22</sup> the external auditor communicates with those charged with governance an overview of the planned scope and timing of the audit. In doing so, the external auditor may discuss matters such as the ~~extent to which the work of internal auditors will be used on the audit engagement, including the~~ planned use of direct assistance.

A25. In accordance with paragraph ~~224~~ of this ISA, the external auditor evaluates the ~~degree of threats to the~~ objectivity and ~~the~~ level of competence of the internal auditors who are ~~used to providing~~ direct assistance ~~on the audit~~ before assigning them to specific tasks.

A25a. As stated in paragraph A5a of this ISA, objectivity refers to the ability to perform the proposed work without allowing bias, conflict of interest or undue influence of others to compromise professional judgments. Factors that may affect the external auditor's evaluation of threats to the objectivity of an internal auditor include the following:

- Family and personal relationships
- Association with the division in the entity to which the work relates
- Financial interests that are exceptional in the circumstances

A25b. In evaluating the level of competence of an internal auditor, many of the factors in paragraph A6 of this ISA may also be relevant but in the context of individual internal auditors and the work to which they may be assigned.

A26. Paragraphs A104-A13 ~~of this ISA~~ provide relevant guidance in determining the work that may be assigned to internal auditors.

A26a. In determining the work that may be assigned to internal auditors, the external auditor is careful to limit such work to those areas that would be appropriate to assign to the internal auditors. Examples of activities and tasks that would not be appropriate to involve internal auditors include the following:

- Discussion of fraud risks. However, the external auditors may make inquiries of internal auditors about fraud risks in the organization in accordance with ISA 315<sup>23</sup>
- Discussion of matters relating to the audit opinion
- Determination of locations for inventory counts
- Determination of unannounced audit procedures as addressed in ISA 240

A26b. In accordance with ISA 505,<sup>24</sup> the external auditor is required to maintain control over external confirmation requests and evaluate the results of external confirmation procedures. Accordingly, it would not be appropriate to assign these responsibilities to internal auditors. However, internal auditors may assist in assembling information necessary for the external auditor to resolve exceptions in confirmation responses.

<sup>22</sup> ISA 260, *Communication with Those Charged with Governance*, paragraph 15

<sup>23</sup> ISA 315, paragraph 6(a)

<sup>24</sup> ISA 505, paragraphs 7 and 16

**Using Internal Auditors to Provide Direct Assistance** (Ref: Para. 23a–24)

- A27. The direction, supervision or review by the external auditor of the audit procedures performed by the internal auditors need to be sufficient in order for the external auditor to be satisfied that the internal auditors have obtained sufficient appropriate audit evidence to support the conclusions based on that work. As individuals in the internal audit function are not independent of the entity as is required of the external auditor when expressing an opinion on financial statements, the external auditor's involvement in these circumstances will generally be of a different nature and ~~direction, supervision or review of the audit procedures performed by the internal auditors will ordinarily be~~ more extensive than if members of the engagement team perform the work.
- A28. The extent of direction, supervision or review of the audit procedures performed by the internal auditors is also dependent on the external auditor's evaluation of the ~~degree of threats to the~~ objectivity and the level of competence of, and the nature and extent of audit procedures to be performed by, the internal auditors. In directing the internal auditors, the external auditor may for example, remind internal auditors to bring all significant accounting and auditing issues identified during the audit to the attention of the external auditor. In Rreviewing the work performed by the internal auditors, the external auditor's ~~includes~~ considerations include ~~of~~ whether the evidence obtained is sufficient and appropriate in the circumstances, and that it supports the conclusions reached.
