

RESPONSE TEMPLATE FOR EXPOSURE DRAFT OF PROPOSED ISSA 5000, *GENERAL REQUIREMENTS FOR SUSTAINABILITY ASSURANCE ENGAGEMENTS*

Guide for Respondents

Comments are requested by **December 1, 2023**. *Note that requests for extensions of time cannot be accommodated due to the accelerated timeline for finalization of this proposed standard.*

This template is for providing comments on the Exposure Draft of proposed International Standard on Sustainability Assurance Engagements™ (ISSA) 5000, *General Requirements for Sustainability Assurance Engagements* (ED-5000), in response to the questions set out in the Explanatory Memorandum to ED-5000. It also allows for respondent details, demographics and other comments to be provided. Use of the template will facilitate the IAASB's automated collation of the responses.

You may respond to all questions or only selected questions.

To assist our consideration of your comments, please:

- For each question, start by indicating your overall response using the drop-down menu under each question. Then below that include any detailed comments, as indicated.
- When providing comments:
 - Respond directly to the questions.
 - Provide the rationale for your answers. If you disagree with the proposals in ED-5000, please provide specific reasons for your disagreement and specific suggestions for changes that may be needed to the requirements, application material or appendices. If you agree with the proposals, it will be helpful for the IAASB to be made aware of this view.
 - Identify the specific aspects of ED-5000 that your response relates to, for example, by reference to sections, headings or specific paragraphs in ED-5000.
 - Avoid inserting tables or text boxes in the template when providing your responses to the questions because this will complicate the automated collation of the responses.
- Submit your comments, using the response template only, without a covering letter or any summary of your key issues, instead identify any key issues, as far as possible, in your responses to the questions.

The response template provides the opportunity to provide details about your organization and, should you choose to do so, any other matters not raised in specific questions that you wish to place on the public record. All responses will be considered a matter of public record and will ultimately be posted on the IAASB website.

Use the “**Submit Comment**” button on the [ED-5000 webpage](#) to upload the completed template.

Response to the Exposure Draft of Proposed ISSA 5000, General Requirements for Sustainability Assurance Engagements

Views from Link Asset Management Limited

Link Asset Management Limited (“Link”) welcomes the IAASB’s initiative to establish an international standard for sustainability assurance, recognizing its potential to enhance the trustworthiness of sustainability disclosures. While we support the general direction of the proposed requirements in the Exposure Draft, we express reservations about applying financial reporting standards directly to sustainability disclosures. Sustainability data often involves estimations and qualitative elements, making it distinct from financial data. The proposed standard could impose significant challenges on preparers of sustainability disclosures, particularly for those at the early stages of sustainability reporting, due to the increased need for detailed and accurate sustainability data.

In our perspective, effective sustainability reporting should inherently reflect a company's commitment to positive societal and environmental impacts, avoiding practices detrimental to human rights or wellbeing. This commitment is integral to what we consider a rational approach to sustainability.

The expertise of assurance practitioners in sustainability is crucial. We suggest that the standard implicitly requires practitioners to possess specific knowledge and certifications in sustainability, ensuring that the assurance process is conducted with a comprehensive understanding of sustainability issues.

Moreover, the role of stakeholder engagement in sustainability reporting is vital. The standard should encourage an examination of how companies engage with and consider the perspectives of those affected by their sustainability practices, ensuring that disclosures are comprehensive and inclusive.

Link’s commitment to sustainability is demonstrated through our adherence to global best practices, including the GRI Standards and the International Integrated Reporting Framework, and our alignment with TCFD recommendations and the ISSB Exposure Draft IFRS S2 Climate-related Disclosures.

In conclusion, while we support the IAASB’s efforts, we advocate for a standard that recognizes the unique characteristics of sustainability data and emphasizes the importance of purposeful, knowledgeable, and inclusive sustainability reporting.

Responses to IAASB’s Request for Comments in the Explanatory Memorandum for ED-5000, General Requirements for Sustainability Assurance Engagements

PART A: Respondent Details and Demographic information

Your organization’s name (or your name if you are making a submission in your personal capacity)	Link Asset Management Limited
Name(s) of person(s) responsible for this submission (or leave blank if the same as above)	Woody Chan
Name(s) of contact(s) for this submission (or leave blank if the same as above)	
E-mail address(es) of contact(s)	Woody.nc.chan@linkreit.com
Geographical profile that best represents your situation (i.e., from which geographical perspective are you providing feedback on ED-5000). Select the most appropriate option.	Asia Pacific
	If “Other”, please clarify
The stakeholder group to which you belong (i.e., from which perspective are you providing feedback on ED-5000). Select the most appropriate option.	Preparer of sustainability information
	If “Other”, please specify
Should you choose to do so, you may include information about your organization (or yourself, as applicable).	

Should you choose to do so, you may provide overall views or additional background to your submission. **Please note that this is optional.** The IAASB’s preference is that you incorporate all your views in your comments to the questions (also, the last question in Part B allows for raising any other matters in relation to ED-5000).

Information, if any, not already included in responding to the questions in Parts B and C:

PART B: Responses to Questions in in the Explanatory Memorandum for ED-5000

For each question, please start with your overall response by selecting one of the items in the drop-down list under the question. Provide your detailed comments, if any, below as indicated.

Overall Questions

1. Do you agree that ED-5000, as an overarching standard, can be applied for each of the items described in paragraph 14 of this EM to provide a global baseline for sustainability assurance engagements? If not, please specify the item(s) from paragraph 14 to which your detailed comments, if any, relate (use a heading for each relevant item).

(See Explanatory Memorandum Section 1-A, paragraph 14)

Overall response: [Click to select from dropdown menu](#)

Detailed comments (if any):

Public Interest Responsiveness

2. Do you agree that the proposals in ED-5000 are responsive to the public interest, considering the qualitative standard-setting characteristics and standard-setting action in the project proposal? If not, why not?

(See Explanatory Memorandum Sections 1-B, and Appendix)

Overall response: [Click to select from dropdown menu](#)

Detailed comments (if any):

Specific Questions

Applicability of ED-5000 and the Relationship with ISAE 3410

3. Is the scope and applicability of ED-5000 clear, including when ISAE 3410 should be applied rather than ED-5000? If not, how could the scope be made clearer?

(See Explanatory Memorandum Section 1-C)

Overall response: [Yes \(with no further comments\)](#)

Detailed comments (if any):

Relevant Ethical Requirements and Quality Management Standards

4. Is ED-5000 sufficiently clear about the concept of “at least as demanding” as the IESBA Code regarding relevant ethical requirements for assurance engagements, and ISQM 1 regarding a firm’s responsibility for its system of quality management? If not, what suggestions do you have for additional application material to make it clearer?

(See Explanatory Memorandum Section 1-D)

Overall response: [Click to select from dropdown menu](#)

Detailed comments (if any):

Definitions of Sustainability Information and Sustainability Matters

5. Do you support the definitions of sustainability information and sustainability matters in ED-5000? If not, what suggestions do you have to make the definitions clearer?

(See Explanatory Memorandum Section 1-E, paras. 27-32)

Overall response: [Yes \(with no further comments\)](#)

Detailed comments (if any):

6. Is the relationship between sustainability matters, sustainability information and disclosures clear? If not, what suggestions do you have for making it clearer?

(See Explanatory Memorandum Section 1-E, paras. 35-36)

Overall response: [Yes, with comments below](#)

Detailed comments (if any):

The link between sustainability matters, information, and disclosures could be clearer. We suggest the standard explicitly outline how these elements interconnect, particularly emphasizing the impact on stakeholders and the environment. Clear guidelines on identifying and prioritizing sustainability matters, with a focus on stakeholder engagement and impact assessment, would enhance understanding and relevance.

Differentiation of Limited Assurance and Reasonable Assurance

7. Does ED-5000 provide an appropriate basis for performing both limited assurance and reasonable assurance engagements by appropriately addressing and differentiating the work effort between limited and reasonable assurance for relevant elements of the assurance engagement? If not, what do you propose and why?

(See Explanatory Memorandum Section 1-F, paras. 45-48)

Overall response: [Yes, with comments below](#)

Detailed comments (if any): To consider if the limited assurance requirements are still too high, particularly in the area of internal controls, considering the broad scope of sustainability information and that many companies are just at the beginning of the journey of collecting and disclosing such information. If the requirements for even limited assurance are too onerous, this will likely result in lesser adoption of companies severely limiting scope of assurance.

Preliminary Knowledge of the Engagement Circumstances, Including the Scope of the Engagement

8. Is ED-5000 sufficiently clear about the practitioner's responsibility to obtain a preliminary knowledge about the sustainability information expected to be reported and the scope of the proposed assurance engagement? If not, how could the requirements be made clearer?

(See Explanatory Memorandum Section 1-F, para. 51)

Overall response: [Yes, with comments below](#)

Detailed comments (if any):

ED-5000 needs clearer guidance on the practitioner's responsibility for understanding sustainability information and the assurance engagement's scope. We recommend specifying the required competencies and knowledge areas, including familiarity with sustainability frameworks and materiality processes, to ensure practitioners are adequately prepared for effective assessment.

9. Does ED-5000 appropriately address the practitioner's consideration of the entity's "materiality process" to identify topics and aspects of topics to be reported? If not, what approach do you suggest and why?

(See Explanatory Memorandum Section 1-F, paras. 52-55)

Overall response: [Yes, with comments below](#)

Detailed comments (if any):

While ED-5000 touches on the practitioner's evaluation of the entity's materiality process, it could be more detailed. The standard should provide criteria for assessing the materiality process, ensuring it

comprehensively identifies significant sustainability topics and aligns with recognized sustainability frameworks for more meaningful disclosures.

Suitability and Availability of Criteria

10. Does ED-5000 appropriately address the practitioner’s evaluation of the suitability and availability of the criteria used by the entity in preparing the sustainability information? If not, what do you propose and why?

(See *Explanatory Memorandum Section 1-F, paras. 56-58*)

Overall response: No, with comments below

Detailed comments (if any):

It may be difficult for the practitioner to comment on the completeness or neutrality of company developed criteria since this is highly subjective and it is also reasonable for a company to narrow its focus/strategy to selected areas.

11. Does ED-5000 appropriately address the notion of “double materiality” in a framework-neutral way, including how this differs from the practitioner’s consideration or determination of materiality? If not, what do you propose and why?

(See *Explanatory Memorandum Section 1-F, paras. 59-60 and 68*)

Overall response: Yes (with no further comments)

Detailed comments (if any):

Materiality

12. Do you agree with the approach in ED-5000 for the practitioner to consider materiality for qualitative disclosures and determine materiality (including performance materiality) for quantitative disclosures? If not, what do you propose and why?

(See *Explanatory Memorandum Section 1-F, paras. 65-74*)

Overall response: Agree, with comments below

Detailed comments (if any):

More guidance is needed on how to ‘determine’ materiality, especially since it was stated in the Explanatory Memorandum that “Materiality is a matter of professional judgment”.

Understanding the Entity's System of Internal Control

13. Do you agree with the differentiation in the approach in ED-5000 for obtaining an understanding of the entity's system of internal control for limited and reasonable assurance engagements? If not, what suggestions do you have for making the differentiation clearer and why?

(See Explanatory Memorandum Section 1-F, paras. 75-81)

Overall response: [Disagree \(with no further comments\)](#)

Detailed comments (if any):

Given that sustainability information is very broad, companies will not have same level of internal control for all sustainability related quantitative and qualitative information and may have various roadmaps of different time horizons for building up quality controls. To encourage companies to adopt ED-5000 for assurance engagements suggest that limited assurance criteria to be less stringent than proposed.

Using the Work of Practitioner's Experts or Other Practitioners

14. When the practitioner decides that it is necessary to use the work of a firm other than the practitioner's firm, is ED-5000 clear about when such firm(s) and the individuals from that firm(s) are members of the engagement team, or are "another practitioner" and not members of the engagement team? If not, what suggestions do you have for making this clearer?

(See Explanatory Memorandum Section 1-G, paras. 82-87)

Overall response: [Yes \(with no further comments\)](#)

Detailed comments (if any):

15. Are the requirements in ED-5000 for using the work of a practitioner's external expert or another practitioner clear and capable of consistent implementation? If not, how could the requirements be made clearer?

(See Explanatory Memorandum Section 1-G, paras. 88-93)

Overall response: [Yes \(with no further comments\)](#)

Detailed comments (if any):

Estimates and Forward-Looking Information

16. Do you agree with the approach to the requirements in ED-5000 related to estimates and forward-looking information? If not, what do you propose and why?

(See Explanatory Memorandum Section 1-G, paras. 94-97)

Overall response: [Agree \(with no further comments\)](#)

Detailed comments (if any):

Risk Procedures for a Limited Assurance Engagement

17. Do you support the approach in ED-5000 to require the practitioner to design and perform risk procedures in a limited assurance engagement sufficient to identify disclosures where material misstatements are likely to arise, rather than to identify and assess the risks of material misstatement as is done for a reasonable assurance engagement? If not, what approach would you suggest and why?

(See Explanatory Memorandum Section 1-G, paras. 98-101)

Overall response: [Yes \(with no further comments\)](#)

Detailed comments (if any):

Groups and “Consolidated” Sustainability Information

18. Recognizing that ED-5000 is an overarching standard, do you agree that the principles-based requirements in ED-5000 can be applied for assurance engagements on the sustainability information of groups or in other circumstances when “consolidated” sustainability information is presented by the entity? If not, what do you propose and why?

(See Explanatory Memorandum Section 1-G, paras. 102-107)

Overall response: [No response](#)

Detailed comments (if any):

Fraud

19. Do you agree that ED-5000 appropriately addresses the topic of fraud (including “greenwashing”) by focusing on the susceptibility of the sustainability information to material misstatement, whether due to fraud or error? If not, what suggestions do you have for increasing the focus on fraud and why?

(See Explanatory Memorandum Section 1-G, paras. 108-110)

Overall response: [Neither agree/disagree, but see comments below](#)

Detailed comments (if any):

Suggest A296 be expanded to include the concept of providing a balanced view to avoid common cases of greenwashing where a company selectively or inadvertently discloses positive information about a company’s environmental or social performance, without full disclosure of negative information on these dimensions and thereby creates an overly positive corporate image.

Communication with Those Charged with Governance

20. Do you support the high-level requirement in ED-5000 regarding communication with management, those charged with governance and others, with the related application material on matters that may be appropriate to communicate? If not, what do you propose and why?

(See Explanatory Memorandum Section 1-G, paras. 111-112)

Overall response: [Yes \(with no further comments\)](#)

Detailed comments (if any):

Reporting Requirements and the Assurance Report

21. Will the requirements in ED-5000 drive assurance reporting that meets the information needs of users? If not, please be specific about any matters that should not be required to be included in the assurance report, or any additional matters that should be included.

(See Explanatory Memorandum Section 1-G, paras. 116-120, 124-130)

Overall response: [Yes, with comments below](#)

Detailed comments (if any):

Written Representations from Management and Those Charged with Governance 148. The practitioner shall request from management and, where appropriate, those charged with governance a written representation: (Ref: Para. A431-A432) **For companies listed on the Hong Kong Stock Exchange, the Board has oversight of a company’s ESG issues, its ESG management approach and strategy. However, detailed items including collection of ESG data and preparation of report would be completed by Management and staff. Preparers should have the discretion/flexibility to provide a written representation from Management or Board Level (Those Charged with Governance) for specific line items.**

22. Do you agree with the approach in ED-5000 of not addressing the concept of “key audit matters” for a sustainability assurance engagement, and instead having the IAASB consider addressing this in a future ISSA? If not, what do you propose and why?

(See Explanatory Memorandum Section 1-G, paras. 121-123)

Overall response: [Agree \(with no further comments\)](#)

Detailed comments (if any):

23. For limited assurance engagements, is the explanation in the Basis for Conclusion section of the assurance report that the scope and nature of work performed is substantially less than for a reasonable assurance engagement sufficiently prominent? If not, what do you propose and why?

(See Explanatory Memorandum Section 1-G, para. 131)

Overall response: [Yes \(with no further comments\)](#)

Detailed comments (if any):

Other Matters

24. Are there any public sector considerations that need to be addressed in ED-5000?

(See Explanatory Memorandum Section 1-I, para. 135)

Overall response: [No response](#)

Detailed comments (if any):

25. Are there any other matters you would like to raise in relation to ED-5000?

Overall response: [Click to select from dropdown menu](#)

Detailed comments (if any):

Part C: Request for General Comments

The IAASB is also seeking comments on the matters set out below:

26. Translations—Recognizing that many respondents may intend to translate the final ISSA for adoption in their own environments, the IAASB welcomes comment on potential translation issues respondents note in reviewing ED-5000.

Overall response: [Click to select from dropdown menu](#)

Detailed comments (if any):

27. Effective Date—As explained in paragraph 138 of Section 1-I – Other Matters, the IAASB believes that an appropriate effective date for the standard would be for assurance engagements on sustainability information reported for periods beginning or as at a specific date approximately 18 months after approval of the final standard. Earlier application would be permitted and encouraged. Do you agree that this would provide a sufficient period to support effective implementation of the ISA. If not, what do you propose and why?

Overall response: [Click to select from dropdown menu](#)

Detailed comments (if any):
